SETTING GLOBAL BENCHMARKS IN MANUFACTURING

Ever since its inception in 1964, Polycab has been relentlessly innovating to make lives easier and safer. Driven by an unwavering commitment to quality and delighting consumers, Polycab has evolved from being India's largest wires and cable manufacturer to becoming one of the country's leading end-to-end electrical solutions brands.

Polycab fans are meticulously designed for aspiring consumers and come in an extensive portfolio that includes ceiling fans, table fans, wall fans, exhaust fans and farrata fans. Polycab Fans are manufactured in one of the largest fan factories in Roorkee, Uttarakhand with every process taking place under one roof. Check out our meticulous manufacturing processes that ensure customers get the highest quality products for years to come.

Automated Copper Winding

The copper winding process is entirely automated and guarantees perfection. Each heavy duty winding uses 99.999% pure copper; thus making it the best in the industry.

Automatic Robotic Paint Shop (imported from Switzerland)

The robotic paint shop, sourced from ITWGEMA, Switzerland coats the various fan parts in a uniform, precise manner. A wide choice of colours followed by a high grade laminated cover to protect the surface complete the in-house painting process.

In-house Automatic Air-Delivery Testing Lab

Each and every finished product is tested in a specifically designed, in-house Automatic Air-Delivery Testing Lab for air delivery and distribution capacity. Polycab fan's superior air delivery between 225 CMM to 260 CMM will rejuvenate every person in the room with a gust of refreshing breeze.

Perfect dimensions with CNC Machine

The fan's blades along with top and bottom cover are built using high quality aluminium on a dedicated assembly line. CNC machines are used to ensure perfect dimensions. The precise optimum angle of the fan blades creates higher air velocity and distributes air evenly.

Inhouse BLDC Fan manufacturing unit at Roorkee

Polycab has gained the expertise of manufacturing BLDC Fans inhouse in our specialised plant in Roorkee. All our BLDC fans models are manufactured inhouse considering utmost quality and durability

Inhouse Fan Electronics manufacturing unit at Halol

Polycab has undergone backward integration and developed its fans electronics facility in Halol. This helps Polycab built complete control on the electronics and cuts down its dependability on other vendors for PCB circuitries.

SILENCIO

SERIES

A royal range of premium fans with cutting-edge designs and advanced BLDC Technology that ensure superior air flow.

SILENCIO CRUISER BLDC

Sweep Size 1200 mm
