THE BENEFITS OF SUGARING

FOR ALL SKIN TYPES

- All natural ingredients:
(Sugar, water, & and lemon)
- Reduces the risk of ingrown hair
- Same temperature as the body
(No burn risk)

IS SUGAR WAXING SAFE FOR THOSE WHO HAVE ECZEMA OR PSORIASIS?

- Sugar only adheres to dead skin cells & and hair which means, the sugar wax is a mild exfoliator and can pick up flakey skin while removing unwanted hair in areas with psoriasis or eczema.
- It doesn't worsen the acidic-alkaline balance of the skin
- Moisturizes the skin during waxing

ABOUT SUGAR WAXING

Sugar waxing:

- Reduces hair growth, sparsity, & and density over time when sugaring regularly
- Easy cleanup (with soap and water)
- Antibacterial & hypoallergenic
- Will not damage delicate facial skin from prolonged use
- Can remove hair after 2/3 days of growth (1/16th inch)
- No resin or harsh chemicals
- Sugar wax is formed against the hair growth, allowing sugar to seep into the hair follicles. When the sugar is removed in the direction of growth, the sugar glides the entire hair out of the hair shaft. This method reduces hair breakage and ingrown hairs.

Common things that can happen after your first sugar wax service

- If you shaved beforehand, each hair follicle is at a different stage of the growth cycle. As a result, you may have stubble growing in a few days after your appointment.
- You may have hair follicles growing multiple hairs at different stages of growth.
