Helping educators, helping students

The mission is simple. We know that in order to have regulated students who can engage in learning, we need our educators to have the skills, capacity and resources to support their own regulation while supporting student regulation. Giving people what they need to achieve co-regulation between adults and students is always our goal.

Our Services

Professional Development

Engaging and interactive professional development that inspires change in classroom practice for positive student outcomes. On-site or virtual training to ensure the best learning environment for your team.

Coaching and Consultation

Individualized coaching and consultation for school leaders and educators to promote a healthy and productive school climate. We specialize in moving teams from theory to practice with hands-on tools and strategies.

Family Engagement

Powerful outcomes can occur when effective, resilience building strategies are practiced both at home and at school. We can help to engage families and caregivers in to enhance student well-being at school and at home.
