# THE KALLIERGO DIFFERENCE

## OUR STEEL TUNNELS

- Our Steel Frames are rolled rather than bent to provide stronger support.
- We treat our Steel Frames with a special blend of paints to enhance UV stability and Steel Protection.
- Perfect for supporting heavy plant trellising.
- Engineered to be robust and long-lasting.
- To enhance resistance and durability, we position our arches closer together at a 1.5m interval.
- Our tunnels are covered with 200-micron plastic made of double-layer polyethylene, known as Multi Solar Plastic. This material is UV treated, antibacterial, infra-red thermal treated, and light-diffusing.
- We protect our tunnels with hail nets.
- Various widths are available:
  - 4.2m Wide x 2.4m High
  - 5.0m Wide x 2.6m High or 2.8m High
