Integrated Docking Software

- Evidence Collection
- Evidence Playback
- Evidence Upload
- Firmware Upgrade
- Localized Evidence Management
- Auto Free Up Storage Space

Overview

Integrated Docking Software (IDS) automates the process of collecting videos, audios, and photos from the body worn cameras (BWCs) and uploads them to the digital evidence management platform, greatly reducing the manual workload and saving valuable time of law enforcement officers. With the IDS, you can also view, play back, and export digital evidence, manage the BWCs, or upgrade the firmware of BWCs though the web client.

Highlights

Auto Collection

Automatically collect the evidence in batches to reduce workload and risk of misoperation.

Localized Evidence Management

Replay and make notes for the evidence, tag the evidence in batches, and more.

Auto Free Up Storage Space

Automatically delete the earliest evidence to release space at interval.

Evidence Export

Facilitate the administrator to export the evidence for archive and storage.

Auto Upload

Automatically upload evidence to the digital evidence management (DEM) platform.
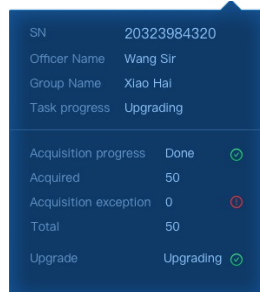

Firmware Upgrade

Automatically detect the BWC version and push the latest firmware to the BWC.
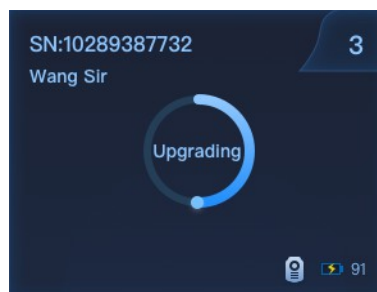

Visualize Your Data

Show you BWC information, acquisition or upgrade progress, acquisition or upgrade status information, and more.

Acquisition progress

Acquisition status info

Upgrade progress

Upgrade status info

Evidence Management

- Store by officer or date
- Search by officer ID, name, tag, or more
- Fast, slow, or loop play, snapshot, or more
- Evidence export and upload
- Automatic or manual evidence upload with a visible progress

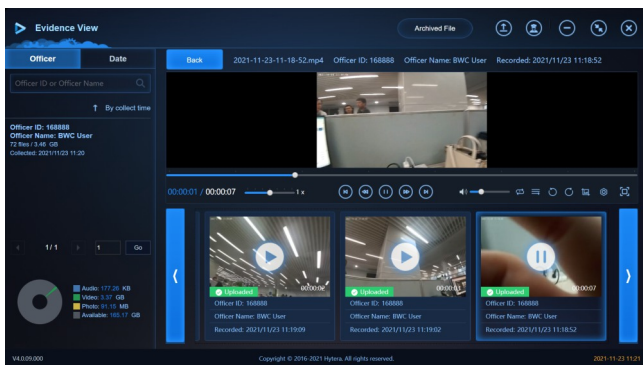

Advanced Search

Search for an evidence by keywords such as file name, officer ID or name, or by recording time, acquisition time, system tag, device tag, or upload status.

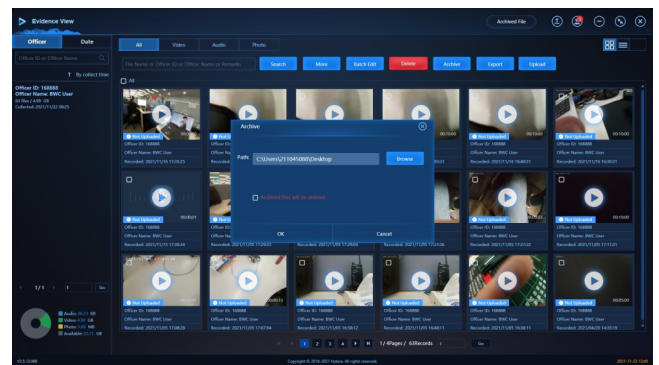

Upload Status

Show you the upload progress in the upload list.

Video Playback

Play back a video in a rapid, slow, loop, or continuous motion. You can also perform snapshot or more operations.

Archive

Export and store key evidence files by acquisition time.
