

# Toddler Care and Education

Energy and excitement are a natural part of growth and learning. We channel that energy into positive learning experiences, giving toddlers room to move and explore. We go beyond daycare to provide nurturing guidance as they develop physical skills and master emerging milestones.

## **In this program, children are provided with:**

- Stimulating classroom environments
- Immersive learning experiences
- Educational toys and activities

As children become more mobile this classroom offers exciting opportunities for exploration and discovery through a variety of learning experiences.

- **Art and Sensory Center**  
Sensory exploration and creative expression (painting, drawing, etc.)
- **Movement Center**  
Using muscle and bodies to stretch, climb, jump, crawl and walk; develop fine and gross motor skills, balance and coordination.
