Who are INNEX?

INNEX Home Improvements are Dorset Showhomes Midlands Team. Formed to help continue support the great work by local independent businesses, we take pride in keeping customer satisfaction and quality of our work. Unfortunately often larger companies try to compete bringing with them a poor quality of work to cut costs which can lower the fantastic reputation in the area.

With that in mind, we have made a commitment to quality and genuine customer care is very much the heart of our customer promise.

As a result we have established a reputation for the superiority of our products and services.

Since then we have grown as a company, providing homeowners with quality and value so that every customer has a great experience.

We now cover the whole of the Midlands, South UK including South Wales & Isle of Wight.

We are registered in England And Wales under company number 10501683. Our

registered office is: Unit 3

Accreditations

We are the winners of the South Prestige Awards - Home Improvement Service of the year 2021/2022 & 2023/2024

Home Improvement Company of the year 2022 & 2023
&
Gold Endorsement Award for Reviews and Social Media

We hold Public Liability Insurance to five million pounds and we take absolute pride in everything we do! We offer 5/10 year warranty on all work we install.

We are recognised by many suppliers for our quality work and have fantastic testimonials to support this on our website.

We are also an approved installer for 'Brett' who manufactures half a million tonnes of block paving products per year.

Mr & Mrs L - DT9

The work was carried out in accordance with the schedule agreed, the workmen were excellent and the first phase was carried out in one day and the resin spread was actually carried out a day ahead of schedule after a call from the crew asking if they could come a day early. The product can be pricey but does look excellent and I would definitely use them again.

We class ourselves as specialists when it comes to laying resin at the time of writing we have laid over 10,000 driveways, patios and paths across the UK in the last 72 months, both for ourselves and through our business-to-business department. As we also lay for other companies, ensure you get a quote from us too, as you may find we're still doing the work but at a much higher cost than if you came to us directly.

We only ever use the highest quality professional grade resin; this means it will not fade and retains it luscious finish. Other companies argue that on certain colours a cheaper alternative or 'buff' resin is acceptable. We do not agree; and to stand by that, we offer a 10 year guarantee on all work we carry out.

We are recognised by many suppliers for being the absolute best at what we do.

Do I need planning permission?

No! All of our products are SUDs (Sustainable Urban Drainage System) compliant. So, the UK Government says: "You will not need planning permission if a new or replacement driveway of any size uses permeable or porous surfacing."

What exactly is a "resin driveway?"

The "resin" refers to a natural, eco-friendly epoxy-like substance that bonds together fine, coloured aggregates, creating a beautiful and long lasting finish with almost unlimited colour and design possibilities.

Will my new driveway ever fade or change colour?

No. Unlike other companies, we only use professional grade and High Durability resin ensuring your driveway will look brand new for years!

There's a local builder who offers resin-bound surfacing and he's cheaper than you, why is this?

Well, the short-and-sweet answer is you get what you pay for! We class ourselves as experts - specialists, not generalists! No other company can offer the same package that we do. We aren't 'giving it a go', we truly are masters of our craft!

What are the benefits of Resin over tarmac or block paving?

Resin is anti-slip, SUDs compliant, anti-weed, anti-crack and anti-flood. It lasts a lot longer and let's be honest, it looks a lot better for a similar price!

Colour and mix options

Below is a small selection of the colours we have on offer

Aspen

Starlight

Kind Words

"We have just had a new resin driveway installed. From start to finish, everything went as the company said it would. Having had the resin put in to replace a gravel driveway really makes a difference to us. They even made our two manhole covers disappear. Their workers are very polite, extremely hard working and their workmanship is excellent. I cannot believe that the resin is finished off manually, it is so smooth. Many thanks from a very satisfied customer"

- BH31

"It was done in 2 stages - dig out of old drive and laying of concrete base - then the resin top layer. Both were done really professionally. The teams that did the work were well coordinated, slick, and efficient. Really happy with the end result." - SO22

"Throughout the whole process the work was carried out in a very professional manner and I am extremely happy with the results."

- SP8

"We are very pleased with the finished driveway. It looks superb, absolutely delighted. The work was completed brilliantly, the work force were amazing and were very professional and the on-going and after sales service were very attentive. We would recommend Dorset Showhomes to everyone, you would not regret your decision".

Resin Surfacing - The process.

Once you've placed your order with your surveyor and paid your deposit, the works will be registered.

Following this our Installations team will be in touch to arrange a mutually convenient fitting date. Our usual wait times are 6-8 weeks, however this may be shorter or longer depending on the amount of work required.

The fitting team will arrive on the agreed date and get started with any preparation work. The team will need brief access to electricity and sometimes water too. Over the next couple of days there may be a lot of heavy machinery moving about as rubbish is removed and concrete is delivered, we keep neighbours in mind so this shouldn't cause any inconvenience.

Once the preparation work is completed we must take a further payment of 50% of the total order value, but your surveyor can advise you further about this. When the resin is delivered, pay no attention to the colour names on the bags - we mix them up to create our bespoke colours!

If we have put a new concrete base down, we need to leave it at least two weeks to fully cure before we put the resin on top. The day we spread the resin, materials will be delivered on pallets ready for the fitting team to unload and use. Please don't unwrap any deliveries, they're wrapped up to keep the stones dry.

Our resin is spread at an average of 18-22mm thick, and we only use professional high grade resin which is guaranteed to last. It is fully permeable which means water drains through, and we apply plenty of anti-slip provisioning during the fitment process.

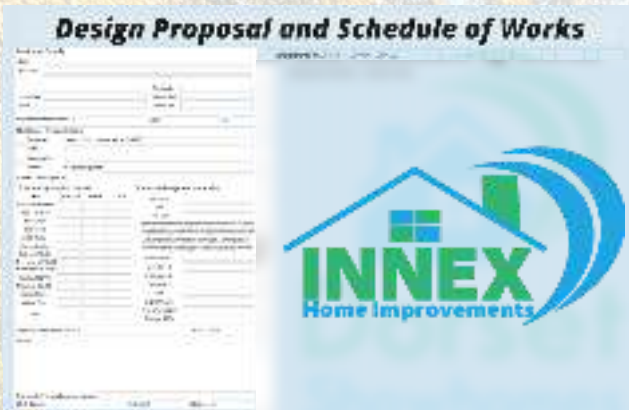

Once the spread is complete and final payment has been made you will receive details of your warranty along with helpful aftercare information in the post. You will also receive feedback forms/link to leave an honest review, we'd be very grateful if you have a chance to complete this.
