Ontario's regulatory requirements for Tire collectors affect you.

We're here to help.

## To keep tires in the recycling stream we need your help.

Every step in the handling of used tires is subject to Ontario law and every party in the chain, from tire producers to collectors, haulers and, recyclers, all have a part to play.

**A recent RPRA inspection of the tire collection network in Ontario found certain requirements were not being met.**

In exchange for the free pick-up of the used tires you collect, a collector agrees to:

**Accept tires from consumers at no charge**  
*(of similar size & weight to the ones you sell & service)*

**Accept tires during regular business hours**  
*(of appropriate category)*

**Accept tires on rims**

We are partners in this – **Tire Recycling Ontario** has resources available to support and advise collectors. We firmly believe in the importance of working with collectors and haulers so we can all succeed and deliver on our regulatory obligations.
