PORTAWINCH 250

The battery powered Winch Assist

The first and only battery powered, portable wheelchair winch available on the market today. 250kg pulling capacity (500kg option available).

Our industry-leading PortaWinch is the perfect solution for any application where assistance is needed with the loading of a wheelchair and occupant into an adapted vehicle.

The unique advantage of the PortaWinch is it can be installed and ready for use within seconds - there is no need for any hardwiring. It detaches from the vehicle floor just as swiftly and can be stored away when not in use. This is particularly useful when space/surface area is limited. The fewer trip hazards left on the floor also increases the safety within your vehicle.

It can be freely transferred from vehicle to vehicle when needed, or fastened to a suitable surface, for example if assistance is required up and down a driveway or access ramp.

PORTAWINCH 250 SPECIFICATION

Maximum load: 250kg.

Assembled weight: 4.7kg / Size: L 230 x W 140 x H 190mm.

Features & benefits:

- ▶ Anti-roll back feature.
