PORTAWINCH 500

The Heavy Duty, Battery Powered Winch Assist Device

Introducing our most powerful, portable wheelchair/stretcher winch so far! An extra heavy duty winch with a colossal 500kg pulling capacity.

Our industry-leading PortaWinch is the perfect solution for any application where assistance is needed with the loading of a wheelchair and occupant into an adapted vehicle.

The unique advantage of the PortaWinch is it can be installed and ready for use within seconds - there is no need for any hardwiring. It detaches from the vehicle floor just as swiftly and can be stored away when not in use. This is particularly useful when space/surface area is limited. The fewer trip hazards left on the floor also increases the safety within your vehicle.

It can be freely transferred from vehicle to vehicle when needed, or fastened to a suitable surface, for example if assistance is required up and down a driveway or access ramp.

PORTAWINCH 500 SPECIFICATION

Maximum load: 500kg.
Assembled weight: 7.2kg / Size: L 280 x W 220 x H 190mm.

Features & benefits:
