Dr. Jack A. Naglieri, Ph.D. Emeritus Professor at George Mason University and Senior Research Scientist at the Devereux Center for Resilient Children. His main interest is the development of psychological and educational tests and the implications these approaches have for accurate and equitable assessment. He has published about 25 books, 50 tests and rating scales, and approximately 300 research papers. Jack is the author of tests used for identification of gifted students including the *Naglieri Nonverbal Ability Test*, the *Naglieri Tests of General Ability Verbal, Quantitative and Nonverbal* with coauthors Dina Brulles and Kim Lansdowne and the forthcoming *Kaufman Multidimensional Assessment of Creativity* with James Kaufman and Cecil Reynolds. He is also well known for his neurocognitive theory of intelligence referred to as PASS and measured with the *Cognitive Assessment System-2<sup>nd</sup> Edition* and the related book *Helping Children Learn-Second Edition*; the *Autism Spectrum Rating Scale* (2010); *Comprehensive Executive Function Inventory* (2013); the *Devereux Elementary Student Strengths Assessment (DESSA)*; and the *DESSA-mini* for universal screening of SEL behaviors. In summary, Dr. Naglieri has an extensive research program that includes scholarly research, books, and psychological tests with an emphasis on uniting sound theory with equitable scientific practice.
