

PennHIP Report

Referring Veterinarian: Dr John Link	Clinic Name: Deer Creek Animal Hospital OK
Email: dtrjohn@coxinet.net	Clinic Address: 20501 Southeast 29th Street
	Harrah, OK 73045
	Phone:
	Fax:

Patient Information

Client: Dykes, Kristy	Tattoo Num:
Patient Name: Katy	Patient ID: 110484
Reg. Name:	Registration Num:
PennHIP Num: 194735	Microchip Num:
Species: Canine	Breed: AUSTRALIAN CATTLE DOG
Date of Birth: 24 Aug 2022	Age: 14 months
Sex: Female	Weight: 37 lbs/16.8 kgs
Date of Study: 13 Oct 2023	Date Submitted: 13 Oct 2023
Date of Report: 15 Oct 2023	

Findings

Distraction Index (DI): Right DI = 0.62, Left DI = 0.47.
Osteoarthritis (OA): No radiographic evidence of OA for either hip.
Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.62.
OA Risk Category: The DI is between 0.50 and 0.69. This patient is at moderate risk for hip OA.
Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 785 canine patients of the AUSTRALIAN CATTLE DOG breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.29 - 0.70) for the breed. The breed average DI is 0.47 (solid square). The patient DI is the solid circle (0.62).

SUMMARY: The degree of laxity (DI = 0.62) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a moderate risk to develop hip OA. No radiographic evidence of OA for either hip.
