Production Proration	Production Planning, Production Recap, Planning Change Tracking
Production Operation	Provide on-site with various functions related to production operations
Shutdown Management	Management and records of various shutdown events, census losses, and analysis of changes
Equipment Operation	Monitor on-site key parameters and deepen procedure applications based on monitored data
LIMS	Record laboratory test results, monitor product quality and analyze product quality trends
Pipeline Monitoring	Monitor pipeline operation, view history and trend analysis
Energy Saving Emission Reduction	Comprehensive management of energy consumption and emission information at the on-site, energy consumption statistics
Product Inventory	Manage the product inventory at the on-site, check the liquid level, temperature, volume, etc.
Measurement Management	Sales of products exported, real-time monitoring and regular summary
Comprehensive Display	Provide comprehensive display function of production and operation management

O&G Reserve → O&G Well → Production Unit → Gathering And Transporting → Terminal
