Empty (\$ Custom_sentence)) {?> Facebook Twitter email email. Some of the stresses that lead to conflicts as stressors have been introduced for the first time by the psychologist Kurt Lewin, one of the founders of modern social psychology. [1] [2] Examine the attitude conflicts to rent when there is an objective or an event that has both positive and negative effects or functions that make the objective attractive and unattractive at the same time. [3] [4] [5] For example, marriage is a serious decision that has both positive and negative aspects. Positive aspects of marriage, that is to say. Y.

[3] [4] [5] For example, marriage is a serious decision that has both positive and negative aspects. Positive aspects of marriage, that is to say. Y. Part of the approach may include taking into account the community, sharing memories and company, while negative aspects, that is to say Y. The avoidance elements may include considerations financial, disputes and difficulties with spouses. The negative affect of a decision helps the decision maker to avoid the objective or the event, while the positive affect influences the decision maker to want to achieve or pursue the objective or the event. The influence of negative and positive aspects creates a conflict because the decision -maker must pursue the objective or avoid it completely. For example, a person who makes a decision(b) The expression of shyness, a conflict of attitude and avoidance characterized by a desire for fear and misunderstanding with others).). Excerpted from: Personality and Individual Differences, 2018 This is a specific conflict with two equally undesirable alternatives. For example, this type of conflict arises when a person must choose unemployment or a salary reduction. Also known as double conflict avoidance. In relation to attitude and attitude conflicts, attitude-avoidance.id, 'custom sakin', truth); If (!blank (\$custom sentnce)) {?> Facebook Twitter -E-mail Email -Copy -Link -Print -Print Samp holds a master's degree in pediatric psychology and is a strong supporter of psychological scientists. Type of stress that causes conflict. Psychologist Kurt Levin, one of the founders of modern social psychology, was the first to present avoidance elements as stressors. [1] [2] Overview Approach Avoidance conflicts arise when there is a goal or event with positive and negative consequences and negative consequences or characteristics that make the goal attractive or unattractive. [3] [4] [5] For example, marriage is the main solution. this has both positive and negative aspects. The positive aspects or parts of the marriage may include commonality, shared memories, and friendship, and the negative aspects or parts of avoidance may include financial considerations, arguments, and difficulties with stepchildren. Negative decision consequences help the person avoid a goal or event, and positive consequences influence the decision that they would like to approach or achieve the goal or event. The influence of negative and positive aspects creates conflict because the decision maker is forced to move forward or avoid. For example, the decision partner can confirmit celebrates with positive and negative aspects. Before starting a business, this person will be pleased with the chance of success of the new company and he (the first first approach) with positive aspects: it will attract investors, increase interest in his upcoming, and that will be and that will be a new challenge. However, as they were closer to starting a business, the negative aspects became more noticeable: The person admits that other aspects of his life will need a lot of effort, time and energy. An increase in these negative aspects (avoidance) will make them avoid conflict or the goal to start a new business, which can lead to indecision. Studies related to approach and avoidance conflicts are associated with indirect causes, both abstract and social. [6] Links ^ Allport, GW (1948). "The genius of Kurt Levin." Approach-avoidance conflict

- Occurs when you are forced to choose an alternative that will have both desirable and undesirable results
- Example...
 - You receive a letter of acceptance from your top college / you want to attend this college, but it is very expensive
 - Will you choose this college or one that is less expensive?
 - Stressful because we experience both good and bad results regardless of what we decide

Positive aspects of marriage, that is to say. Y. Part of the approach may include taking into account the community, sharing memories and company, while negative aspects, that is to say Y. The avoidance elements may include considerations financial, disputes and difficulties with spouses. The negative affect of a decision helps the decision maker to avoid the objective or the event, while the positive affect influences the decision maker to want to achieve or pursue the objective or the event. The influence of negative and positive aspects creates a conflict because the decision -maker must pursue the objective or avoid it completely.
