MEDICAL CLINIC

AMAYOKARE

AMAYOKARE

Specialized expertise led by Dr. Sonnie E. Oyama MD, CIME, MMed, MM, FAIDH, FRACGP, FACHI, CCBOM, MRO.

The Vampire Breast Lift® is a subtle, natural lift and rejuvenated skin texture using the power of your own biology.

No scalpels, no implants, and zero downtime.

HOW DOES THE VAMPIRE BREAST LIFT® WORK?

A 100% natural Platelet-Rich Plasma (PRP) treatment:

- A small blood sample is drawn and processed in a state-of-the-art centrifuge to isolate the potent PRP.
- Comfort-first treatment: A medical-grade numbing cream is applied before precision injections are administered with fine needles.
- Gradual, lasting results: while you may see immediate fullness from the injection, full regenerative results typically peak at 2-3 months and can last up to 18-24 months.

WHAT ARE THE BENEFITS?

- A non-surgical way to improve perkiness, smooth skin texture, and fade stretch marks naturally.
- Natural Results: Uses your own cells with zero risk of allergic reaction.
- Ideal for addressing slight drooping due to aging, weight loss, or breastfeeding, rather than severe sagging that requires skin removal.
- Better Skin Quality: Effective at reducing stretch marks, crepiness, and wrinkles on the chest and cleavage area.
- No Downtime: It is a non-surgical alternative with minimal pain, no incisions, and no required recovery time.

Vampire
BREAST LIFT®

THE VAMPIRE BREAST LIFT®

IF YOUR BREASTS HAVE:

Mild sagging, want better skin quality, desire subtly fuller breasts, increased volume through collagen growth, improved tissue firmness, and seek improved nipple sensitivity, then the Vampire Breast Lift® could be the procedure for you. Results can vary from person to person and no procedure works the same for all.
