GIBBONS

MEDICAL CLINIC

AMAYOKARE

AMAYOKARE

Specialized expertise led by Dr. Sonnie E. Oyama MD, CIME, MMed, MM, FAIDH, FRACGP, FACHI, CCBOM, MRO.

See dramatic improvement with a straighter and firmer erection. Results can vary from person to person and no procedure works the same for all.

DO YOU SUFFER WITH:

- Decreased sensation & pleasure?
- Inability to achieve firmness during relations?
- Difficulty maintaining firmness until your partner is satisfied?
- Trouble maintaining firmness during relations?
- Decrease in size (often seen with normal aging)?
- An angle that causes pain or inability to have relations? (Peyronie's Disease)
- Family relations strained because of any of the above problems?

POSSIBLE BENEFITS OF THE P-SHOT® PROCEDURE:

- Non-surgical and drug free.
- Enjoy sexual relations on the day of the procedure.
- Increased sensitivity and desire.
- Larger girth & length.
- Almost instantaneous results.
- Fast and relatively painless.
- Better, healthier sex.
- Improved relations and stronger family.

**Enjoy a better and
healthier sex life!

Priapus Shot®

THE P-SHOT®

HOW DOES IT WORK?

The Priapus Shot® procedure is a quick, usually painless, 20 minute nonsurgical procedure. The P-Shot® procedure begins with numbing the penis and then a simple blood draw. Then, using a proprietary technique, platelet rich plasma is extracted from the blood and then injected into the shaft and into the head of the penis.

There is no recovery time and the results are almost immediate in some men. Full results appear in 2-3 months.

WHO CAN GET IT?

Your doctor or nurse will help determine if this could work for you and your family. Men both on and off testosterone replacement, those with diabetes, young and old can benefit from the Priapus Shot® procedure. The procedure could lead to lower doses of erectile meds but may not always allow their discontinuation. Smokers may get less results. Size improvements occur less reliably.
