ABOUT US

MediPlix

MediPlix is a next-generation medical co-working ecosystem and AI-driven practice management platform created to modernize the way healthcare services are delivered and managed. Built for doctors, clinics, hospitals, pharma companies, and patients, MediPlix bridges clinical excellence with technological intelligence—offering ready-to-use medical spaces, operational support, and smart digital tools that redefine convenience, efficiency, and patient experience.

Our platform enables healthcare professionals to practice without administrative burdens, financial constraints, or rigid long-term commitments. With fully equipped consulting rooms, AI-powered EMR, clinical workflow automation, and pay-per-use accessibility, MediPlix serves as a dynamic, cost-effective, and future-ready healthcare infrastructure solution.

HOW MEDIPLIX SERVES THE HEALTHCARE ECOSYSTEM

01. Doctors & Independent Clinics

MediPlix empowers doctors to start or expand their private practice instantly— with zero capital investment and zero operational worries.

Key benefits include:

- Fully furnished and sanitized consulting rooms available on-demand
- AI-enabled EMR and digital patient record management
- Appointment scheduling, billing, and queue management system
- Dedicated reception, nursing, and administrative support
- Flexible pay-per-use model, ideal for part-time or multi-location practice
- Enhanced patient experience through organized and tech-enabled workflows

02. Hospitals

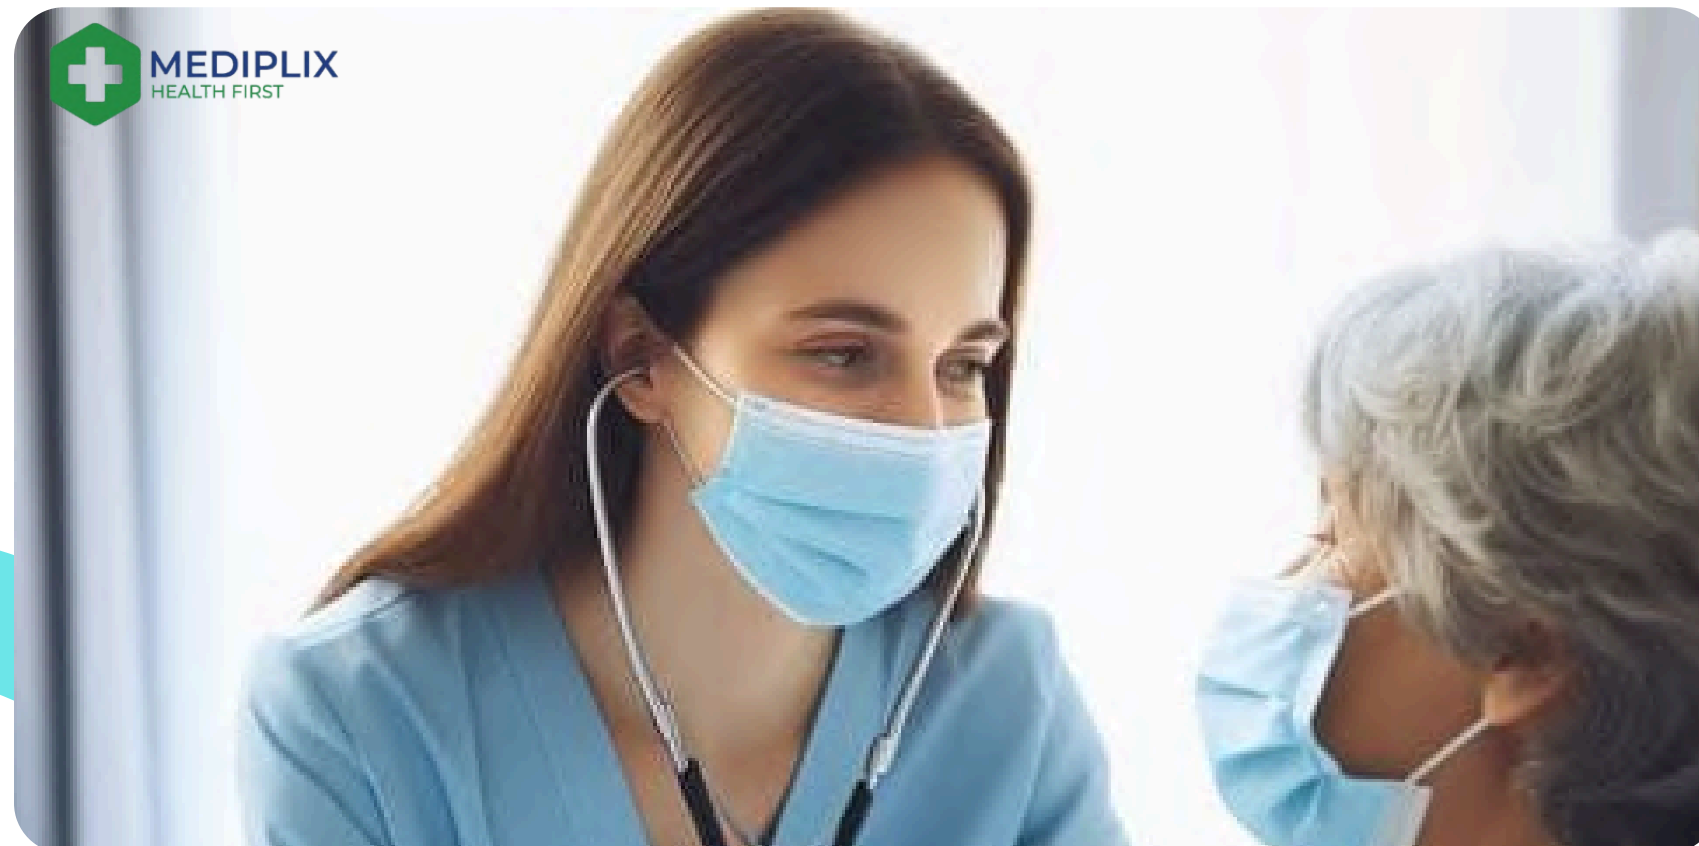

Hospitals can leverage MediPlix to expand and optimize their service delivery through:

- Satellite OPD setups, enabling brand presence in new locations
- Overflow management for high-patient-load departments
- Modular expansion without construction or infrastructure costs
- Smart analytics, EMR integration, and workflow automation

03. Pharma & Healthcare Companies

Pharma organizations use MediPlix to strengthen medical engagement and outreach through:

- Spaces for CMEs, small medical events, and round-table discussions
- Dedicated rooms for doctor interactions and product briefings
- Tech-enabled platforms for digital collaboration and knowledge sharing
- A compliant environment for clinical programs and awareness initiatives

04. Patients

MediPlix places patients at the center of the ecosystem by offering:

- Easy access to a wide network of doctors across multiple specialties
- Shorter waiting times with organized queue systems
- Complete digital medical records and follow-up reminders
- AI-assisted workflows ensuring accurate, transparent, and efficient care
- A comfortable, professional, and streamlined clinical experience

VISION

To become the world's leading medical co-working and AI-driven practice management platform, empowering effortless private clinics that put patient well-being at the center of modern healthcare.

MISSION

- ✓ To provide an affordable, ready-to-use medical workspace ecosystem that enables doctors to start practicing instantly without financial risks.
- ✓ To eliminate administrative, operational, and infrastructural burdens, so healthcare professionals can focus solely on delivering high-quality patient care.
- ✓ To integrate AI-driven tools that simplify practice management, enhance documentation efficiency, and improve overall clinical workflows.
- ✓ To empower independent practitioners with flexible, hassle-free, and scalable practice solutions that support long-term professional growth.

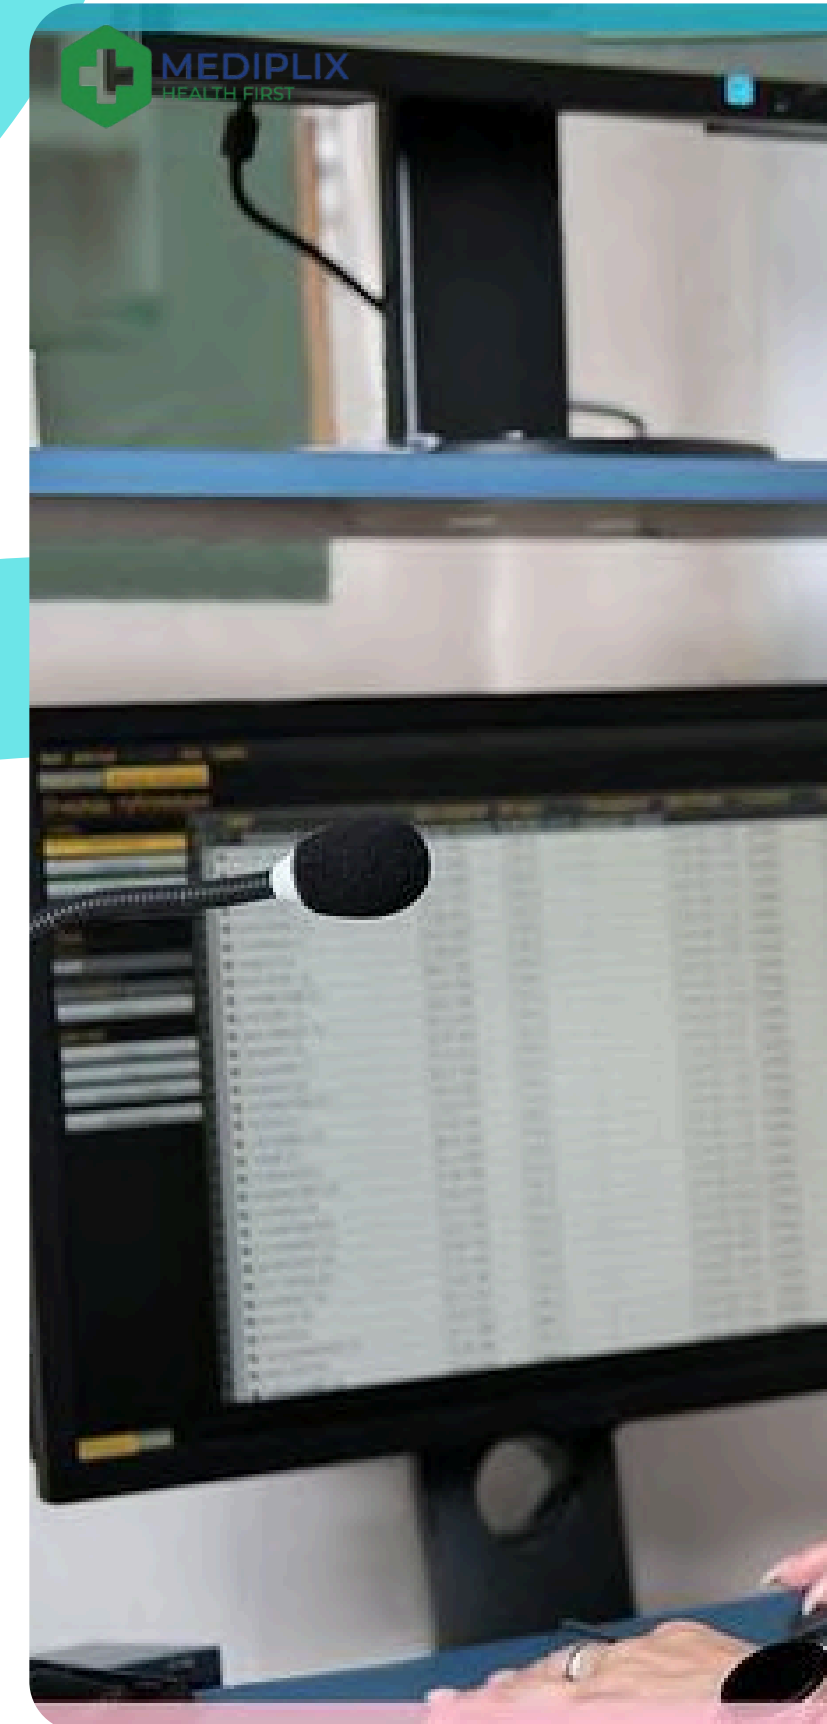

PRODUCTS

01. EMR & Clinic Management System

MediPlix offers an advanced AI-powered Electronic Medical Records (EMR) and clinic management suite designed to simplify, accelerate, and elevate everyday clinical workflows. Built for speed, accuracy, and seamless usability, the system empowers doctors to deliver superior patient care with minimal administrative effort.

Key Capabilities:

- **Intelligent Clinical Documentation:** Auto-filled case sheets, smart templates, voice-to-text notes, and automated diagnosis suggestions.
- **Smart Prescription Builder:** Quick prescription creation with drug suggestions, dosage recommendations, and digital sharing options.
- **Appointment & Queue Management:** Real-time appointment booking, queue automation, patient alerts, and time optimization.
- **Billing & Payments:** Integrated billing, customizable invoices, online payment collection, and financial reports.

02. Hospital Management Solutions

MediPlix delivers a comprehensive infrastructure and management framework supporting hospitals, specialty clinics, and multi-center networks.

Our solutions focus on scalability, operational excellence, and cost-effective expansion.

What We Provide:

- Ready-to-Use Consulting Rooms: Fully furnished OPD rooms equipped for specialists, visiting consultants, and satellite units.
- Managed OPD Spaces: End-to-end management of outpatient departments, including staffing, workflow optimization, and digital support.
- Integrated Digital Workflows: Electronic records, appointment systems, triage assistance, and automated reporting integrated with hospital systems.
- Administrative Streamlining: Standardized processes for patient flow, documentation, billing, and compliance monitoring.

03. Pharma Engagement Solutions

MediPlix offers a hybrid digital–physical platform that allows pharma professionals to collaborate with medical practitioners in a structured, ethical, and productive environment.

Key Features:

- Doctor Engagement Spaces: Dedicated rooms for product discussions, demos, and clinical meetings.
- CME & Training Facilities: Infrastructure for continuing medical education sessions, workshops, and round-table programs.
- Digital Tools for Pharma Teams: Appointment coordination, compliance-driven communication tools, and data-backed engagement insights.
- Brand Support Solutions: Tailored modules for awareness programs, therapy area education, and collaborative health initiatives.
- Regulatory & Ethical Compliance: Strict adherence to medical marketing guidelines and transparent engagement protocols.

04. Patient Management Platform

MediPlix brings the entire patient journey—from discovery to follow-up—into a single, organized, technology-enabled system. Designed to offer a smooth, transparent, and modern clinical experience, the platform enhances trust, convenience, and continuity of care.

Patient-Focused Capabilities:

- Digital Medical Records: Secure, long-term storage of prescriptions, labs, radiology reports, and visit summaries.
- Automated Bookings & Reminders: Appointment confirmations, follow-up notifications, and personalized recall messages.
- Queue & Visit Management: Reduced wait times through real-time queue tracking and workflow prioritization.
- Invoicing & Payment Management: Clear, digital invoicing with multiple payment options and automatic receipts.
- Data Privacy & Security: HIPAA-inspired protection standards, encrypted storage, and controlled access protocols.

THE PROBLEM IN TODAY'S PRIVATE PRACTICE

01. Heavy Upfront Investment Requirements

MediPlix offers an advanced AI-powered Electronic Medical Setting up a clinic typically requires significant capital expenditure, including:

- High monthly rentals or long-term lease deposits
- Costly interior setup to create a professional, patient-friendly environment
- Expense on medical equipment, furniture, IT systems, and utilities

For many doctors, this financial burden becomes a major deterrent, especially when starting post-graduation or relocating.

02. Long-Term Financial Commitments With No Patient Guarantee

Traditional clinics operate on fixed costs, even when patient footfall is uncertain. Doctors must commit to:

- Multi-year leases with non-negotiable rent increases
- Monthly overheads that continue regardless of patient inflow
- Maintenance charges, electricity bills, support staff salaries, and digital tools

03. Hiring, Training & Managing Non-Clinical Staff

A private clinic requires dependable support staff, but managing them poses challenges:

- Recruitment and training of receptionists, nurses, assistants, and housekeeping staff
- Ensuring staff punctuality, professionalism, and patient handling skills
- Dealing with attrition and re-hiring
- Continuous supervision and HR responsibilities

04. Outdated Paperwork & Manual Processes

Traditional practice workflows are largely manual:

- Patient history and records maintained on paper
- Handwritten prescriptions
- Manual billing and invoice generation
- Appointment scheduling on registers or phone calls

These outdated processes slow down practice, create errors, and lack accessibility for modern patients who expect digital convenience.

05. Operational Overheads & Business Stress

Running a clinic requires consistent effort beyond medical expertise:

- Marketing and patient outreach
- Inventory management and pharmacy coordination
- Compliance, licensing, and documentation
- Maintaining cleanliness, utilities, and equipment uptime

Many doctors experience burnout because they are forced to play clinician, administrator, and business manager simultaneously.

06. Limited Flexibility & Practice Scalability

Traditional setups restrict doctors to fixed locations and working hours. This makes it difficult to:

- Practice in multiple areas or cities
- Scale to new branches without repeating the same heavy investments
- Offer flexible timing based on personal or professional needs

As a result, many practitioners remain confined to a single location with limited growth potential.

FACILITIES & WORKSPACE EXPERIENCE

01. Fully Furnished, Ergonomically Designed Consulting Rooms

Each consulting room is thoughtfully planned to support optimal doctor–patient interaction and clinical workflow. The features include:

- High-quality furniture and superior ergonomic seating
- Clinical lighting for accurate assessment
- Adequate storage, workspace utilities, and medical-grade fittings
- Enhanced privacy for confidential patient discussions
- A professional ambience aligned with modern healthcare standards

These rooms ensure comfort, efficiency, and a premium consultation experience.

02. Central Reception & Patient Navigation System

A dedicated reception team manages the entire patient journey from arrival to exit.

This includes:

- Patient registration and verification
- Queue management and real-time doctor availability
- Guiding patients to waiting areas or consulting rooms
- Handling inquiries, follow-ups, and scheduling assistance

Doctors save time while patients receive organized, courteous, and seamless service.

03. Digital Booking & Walk-In Management

MediPlix integrates smart, technology-driven solutions for smooth operations:

- Online appointment booking and slot availability
- Automated visit confirmations and reminders
- Real-time walk-in registration
- Digital queue display and estimated waiting times
- Sync with AI-enabled EMR for quick onboarding

This minimizes waiting times and enhances transparency for both patients and practitioners.

04. Clinical-Grade Sanitization & Infection Control

Hygiene and safety are top priorities at MediPlix. Facilities maintain:

- Routine deep cleaning and surface sanitization
- Disinfection protocols between consultations
- Air-quality management and proper ventilation
- Medical waste segregation and safe disposal
- Compliance with clinical infection-control guidelines

These measures create a safe, hygienic environment for continuous patient care.

05. Uninterrupted Power & Reliable Infrastructure

To ensure smooth clinical operations, MediPlix provides:

- 24/7 reliable power supply with backup systems
- High-speed internet connectivity
- Regular equipment maintenance and facility upkeep
- Redundant operational support for uninterrupted service delivery

Doctors enjoy consistent performance and zero downtime.

06. Dedicated Non-Clinical Support Team

A trained and courteous support team handles all non-clinical responsibilities, including:

- Reception and patient coordination
- Nursing assistance where applicable
- Daily facility management and maintenance
- Billing support and appointment handling
- IT support and troubleshooting

Doctors focus solely on medical care while MediPlix manages the operations end-to-end.

07. Peaceful, Performance-Oriented Workspace

MediPlix delivers an environment built specifically for healthcare excellence:

- Minimal distractions and smooth movement flow
- Ambient design that reduces stress and enhances focus
- Professionally managed spaces that reflect global standards
- A calm and comforting atmosphere for patients and doctors alike

This ensures a premium, predictable, and high-performance workspace suitable for top-quality clinical practice

PRACTITIONERS ACROSS SPECIALIZATIONS

MediPlix is designed as an inclusive, multi-specialty ecosystem that supports a diverse range of healthcare professionals, enabling them to practice independently, flexibly, and efficiently. Our ready-to-use consulting spaces, tech-enabled workflows, and operational support make MediPlix an ideal platform for specialists across the medical spectrum—whether they are seasoned practitioners, visiting consultants, or doctors establishing themselves in a new location.

SERVING A COMPREHENSIVE RANGE OF MEDICAL SPECIALISTS

01. General Physicians & Family Medicine Practitioners

Benefit from accessible consultation rooms, efficient EMR systems, and high patient walk-in potential—ideal for everyday primary care and routine consultations.

02. Paediatricians

Child-friendly, hygienic spaces with smooth appointment management and quick documentation tools ensure a comforting experience for young patients and their families.

03. Gynaecologists & Obstetricians

Private, well-equipped rooms allow professionals to offer antenatal care, follow-up consultations, and women's health services with enhanced discretion and comfort.

04. Dermatologists & Aesthetic Specialists

Clinical-grade lighting, sanitization protocols, and professional ambience enhance both medical dermatology and cosmetic consultation experiences.

05. Orthopaedic Specialists

Spacious consulting rooms and flexible scheduling support both physical assessments and follow-up visits for acute and chronic orthopaedic conditions.

06. ENT Specialists

Ready-to-use spaces with optimal layout for examinations and patient flow.

07. Cardiologists

A calm, confidential environment ideal for cardiac evaluations, counselling, and follow-up consultations.

08. Dentists

Suitable for counselling, evaluations, and general dental guidance prior to procedures.

09. Physiotherapists & Rehabilitation Experts

Well-managed spaces ideal for assessment-based therapy, pain management counseling, and treatment planning.

10. Psychiatrists & Psychologists

Quiet, private rooms create a safe, comfortable setting for behavioural health consultations and counselling sessions.

11. Ophthalmologists

Ideal for follow-ups, vision counselling, prescription checks, and pre/post-operative consultations.

12. Neurologists, Urologists & Nephrologists

Specialists benefit from organized documentation, privacy-focused consultation spaces, and smooth EMR integration for complex cases.

13. Endocrinologists & Diabetologists

Digital patient records, reminders, and analytics support chronic disease monitoring and follow-up care.

14. Alternative Medicine Practitioners

Including Ayurveda, Homeopathy, Naturopathy, and other holistic systems—practitioners gain modern, easy-to-access spaces while delivering traditional care.

15. Other Specialists

From rheumatologists to pulmonologists, geriatric doctors to nutritionists—MediPlix accommodates the evolving needs of a wide spectrum of healthcare disciplines.

16. A Platform for All Healthcare Professionals

Every practitioner who values :

- Independence (free from long-term leases and overheads)
- Flexibility (practice as per preferred days and timings)
- Professionalism (premium, fully managed clinical spaces)
- Convenience (no admin, maintenance, or staffing worries)

finds a dependable, growth-friendly home at MediPlix.

HOW IT WORKS

Join the Platform

Complete Your Enrolment & Verification

Getting started with MediPlix is easy and transparent. Doctors complete a quick onboarding process that includes:

- Profile creation and KYC verification
- Medical registration authentication (MCI/State Council)
- Selection of preferred location(s)
- Agreement signing based on flexible usage plans

Our team assists throughout the process, ensuring that practitioners are verified, registered, and ready to practice in no time.

Book Your Consulting Slot

Choose Your Preferred Time, Day & Room

Once onboarded, doctors gain access to the MediPlix booking system, where they can:

- Select consulting rooms based on availability
- Choose preferred days and time slots
- Book in advance or reserve slots on demand
- Manage schedules across multiple locations
- Block recurring weekly/monthly practice timings

This flexible model allows practitioners to design their own practice routine without restrictions or fixed commitments.

Walk In & Start Your Practice Instantly

Fully Equipped, Ready-to-Use Consulting Spaces

******Doctors simply arrive at their chosen slot and start seeing patients immediately. MediPlix ensures that:

- The consulting room is prepped, sanitized, and fully ready
- Reception staff registers and guides patients
- All required equipment, stationery, and amenities are in place
- Digital tools (EMR, appointments, queue system) are available at login

There is no setup time, no administrative preparation, and no operational interruptions—just pure clinical practice.

JoiAutomatic Admin Handling

End-to-End Support for a Stress-Free Practice

MediPlix manages all non-clinical activities behind the scenes so doctors can focus solely on patient care. This includes:

- Digital patient record management through AI-enabled EMR
- Automated billing, invoice generation, and payment tracking
- Appointment scheduling and reminders for follow-ups
- Queue management and patient flow coordination
- Reception support and patient assistance
- Facility maintenance, sanitization, and utilities management

Trust & Concept Validation

01. Medical Co-Working Models

Around the world, shared medical spaces have become a powerful solution for doctors seeking flexible, cost-effective practice options. These models have demonstrated:

- Faster practice setup without capital investment
- Reduced financial burden for new and visiting practitioners
- Higher occupancy utilization and shared operational efficiency
- Multi-specialty collaboration under one ecosystem

MediPlix adopts these principles and adapts them for the Indian context—where demand for affordable, high-quality, and flexible clinical spaces continues to grow.

02. AI-Enabled EMR & Practice Management Systems

Leading healthcare economies (US, UK, Singapore, Middle East) rely heavily on AI-driven digital tools to streamline clinical workflows. These systems have proven to:

- Reduce documentation time
- Improve diagnostic accuracy using AI assistance
- Enhance continuity of care with long-term digital records
- Elevate patient satisfaction through seamless digital experiences
- Support data-driven decision-making for both doctors and providers

03. Usage-Based Consulting Infrastructure

Pay-per-use clinical environments are increasingly popular worldwide due to their practicality and financial neutrality. These models have shown:

- Better cost-efficiency compared to traditional fixed-rent clinics
- Freedom for doctors to practice across multiple locations
- Higher income potential due to flexible scheduling
- Reduced administrative pressure and operational stress

MediPlix refines this model to fit Indian healthcare patterns—offering maximum flexibility, transparent pricing, and ready-to-operate consulting rooms.

Why These Models Are Globally Successful

Across international healthcare systems, these innovations have consistently delivered:

- Improved profitability for solo practitioners
- Faster time-to-practice for newly graduated specialists
- Superior patient experiences with digital-first workflows
- Better work-life balance due to minimal administrative load

MediPlix: Bringing Proven Innovation to India

MediPlix takes these globally successful frameworks and localizes them to address the unique realities of the Indian healthcare environment:

- Diverse patient volumes and expectations
- Fragmented clinic setups with inconsistent workflows
- High setup costs and long-term rental burdens
- Growing demand for digital health and transparent patient management scalable, and designed for long-term impact in India's rapidly evolving healthcare ecosystem.

WHY CHOOSE US

01. Zero Leases, Zero Overheads, Zero Staff Management

Traditional clinics come with long-term rentals, heavy setup investments, and ongoing staff-related challenges. MediPlix eliminates these issues entirely by offering:

- No long-term lease agreements or lock-ins
- No capital expenditure on interiors, equipment, or utilities
- No hiring, training, or supervising of non-clinical staff
- No burden of monthly overheads like electricity, housekeeping, consumables, or maintenance

Doctors simply pay for the time they use and save money, time, and energy.

02. Fully Equipped, Ready-to-Use Consulting Rooms

Every consulting room at MediPlix is designed for immediate functionality and comfort. Doctors can:

- Begin consultations immediately upon arrival
- Use professionally furnished, hygienic, and ergonomically designed spaces
- Enjoy privacy, ambience, and clinical readiness that enhances patient trust
- Access all utilities, digital tools, and support staff without setup delays

It's a plug-and-play clinical practice experience.

03. Zero-Risk Economics with Flexible Usage-Based Billing

MediPlix operates on a transparent, pay-per-use financial model that ensures:

- No financial exposure or long-term commitments
- Ability to scale practice up or down based on personal availability
- Affordable, predictable billing aligned with actual usage
- Freedom to practice across multiple locations without additional investment

This model makes private practice financially viable for both new and experienced doctors.

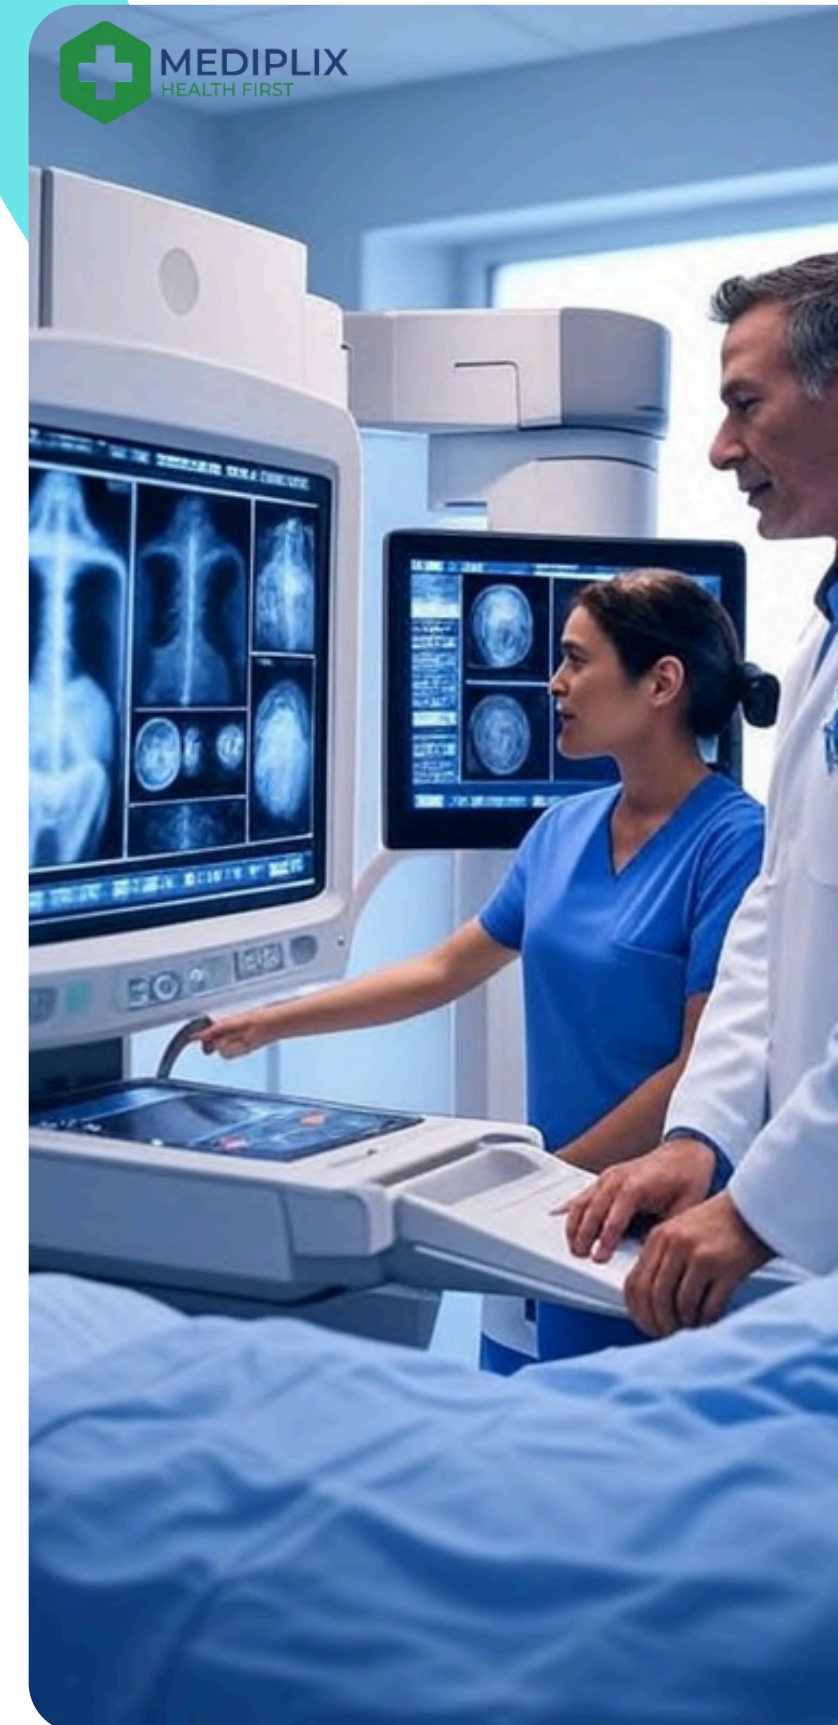

04. AI-Powered EMR for Smarter, Faster Clinical Workflows

Our intelligent EMR platform automates documentation and improves clinical accuracy through:

- Smart templates and auto-generated case notes
- Digital prescriptions with drug suggestions and dosage recommendations
- Automated storage of patient history, labs, and follow-up reminders
- Queue management, scheduling, and billing integrated in one system
- Analytics and insights to support clinical decision-making

Doctors spend less time on paperwork and more time on patient care.

05. End-to-End Operational Relief

MediPlix handles the entire ecosystem so doctors don't have to worry about anything non-clinical:

- Patient registration, scheduling, and reception services
- Queue management and patient communication
- Billing support and payment assistance
- Facility cleaning, sanitization, and maintenance
- Technical support and infrastructure reliability

This frees practitioners from all administrative burdens and lets them focus exclusively on treatment.

06. Built for Modern Healthcare—Speed, Convenience & Accuracy

With technology-driven processes and globally inspired clinical standards, MediPlix ensures:

- Faster turnaround times and reduced waiting periods
- Flawless digital records accessible anytime
- Enhanced patient satisfaction through organized workflows
- Consistent, smooth, and high-quality clinical practice
- A professional environment that boosts reputation and trust

Every aspect is optimized to support efficiency, precision, and an exceptional clinical experience.

MediPlix Mission 2030

MediPlix Coin (MPX), MediPlix Chain and MediPay

Did you know that crypto is making its way into the healthcare industry? Blockchain in healthcare can assist and promote general health and well-being. While some healthcare cryptos offer better access to patient records and hospital systems, others reward you for living a healthy lifestyle.

Medical crypto can be better than traditional options, through alternative financing or insurance. Whether you want a crypto asset to invest in or include it in your daily life, we have you covered.

The MediPlix Chain project is developing a platform based on the Ethereum blockchain. It allows users to store their medical data on a medical blockchain and grant data access to medical professionals.

Any interactions with the data are recorded and maintained securely. During this process, patient privacy is protected. MediPlix Chain is also creating a platform for other providers to develop on. This allows for innovations in user experience and a wider reach of the platform.

MediPlix is currently developing two applications – a digital consultation application and a health data market. The first one allows users to consult a doctor remotely for a small fee. The marketplace allows users to sell their medical data to medical researchers. This gives users data ownership and allows them to benefit from their data sale.

MediPlix's token is called MediPlix (MPX). The total supply is 10 billion MPX, with a market cap of almost USD 100 Billion.

GUARANTEED RETURN ON INVESTMENT

Every investment made in MediPlix is safeguarded through a formal buy-back guarantee, ensuring that investors receive double their initial investment within a 60-months (5-years) period.

This guarantees:

**100% capital
protection**

**Assured 2x returns
within a fixed
timeline**

**Zero exposure to
operational risk or
market fluctuations**

**Legally compliant buy-
back documentation
and agreements**

RISK-FREE, TRANSPARENT INVESTMENT STRUCTURE

The investment model has been structured to eliminate uncertainties. MediPlix manages infrastructure, operations, and utilization, while BMP Ventures Pvt. Ltd. backs the investment financially. This ensures:

Scalable and Sustainable Economics

The MediPlix healthcare model is built on usage-based revenue and asset-light expansion, allowing continuous scalability without high fixed costs. This strengthens the investment by ensuring:

- Multiple revenue streams across doctors, hospitals, pharma, and patients
- Sustainable operational margins due to pay-per-use infrastructure
- Strong demand-driven growth potential in the healthcare sector

Why Investors Trust MediPlix

- Backing from an established and reputed company, BMP Ventures Pvt. Ltd.
- A structured, contract-based guarantee ensuring returns without risk
- Transparent financial terms with no hidden charges or variable conditions
- Reliable long-term outlook due to healthcare sector stability and MediPlix's unique co-working model
