

DISCOVERING YOUR PURPOSE IN TODAY'S WORLD

Our careers give us purpose and meaning—they shape our identity. So what happens when our employment unexpectedly changes or ends? That's the question we faced nearly five years ago during the global health crisis, and it's a question that still looms large today.

At Job Seekers' Garden Club, we watched you face times of uncertainty and transition with courage and resiliency. Some of you left corporate America and started your own businesses. Others found new purpose by turning to God and family. Some spent years in challenging job searches but never lost hope. Despite the circumstances, you continued to move forward.

Now, it's time for your stories to be heard. Your diverse journeys prove that struggles can lead to triumphs. Let's use our collective experiences to help job seekers in the United States and beyond find their purpose in an ever-changing world.

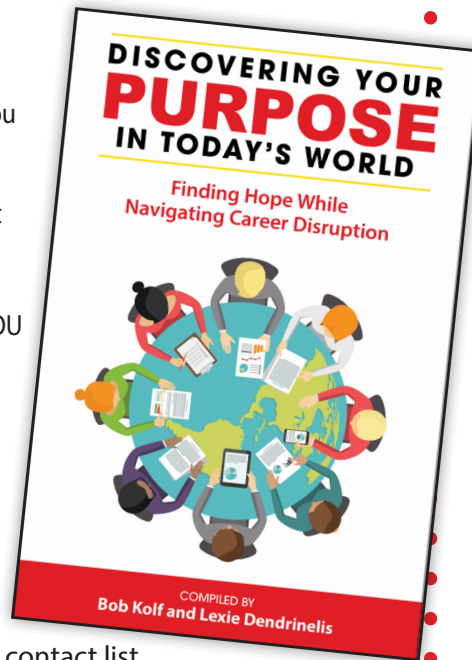

"What would I write about?!"

Our Writing Coach helps you every step of the way as you share how you encountered obstacles, overcame miscommunications, and forged a path of unity forward—becoming well-respected in your community AND most importantly, learning to respect yourself.

Navigating the workplace, family, and self-care can be daunting and stressful—let alone overwhelming. Yet, YOU are the one who found a way around (or through!) the roadblocks rather than letting them get the best of you.
