

Risk Assessment

With so many different regulatory and statutory requirements that organizations are required to comply with, it is difficult to expect in-house staff to intimately know each and every one of them.

Regardless of your assessment needs (ADA, CFATS, FDA, FISCAM, FISMA, GDPR, HIPAA, ISO, NERC, PCI, SOX etc), Abidance Consulting has the talent necessary to ensure that you receive an accurate assessment of your current status and what is necessary to achieve total compliance with the requirements.

The Risk Assessment will provide you a detailed view of all requirements and their findings, a management “snap-shot” that gives a high-level overview for your upper-management. There is a detailed report that pinpoints what is required to achieve compliance in chronological order.

The Abidance Consulting compliance team will consider evidence provided and generally determine the assessment status of the evidence/documents presented and samples of audit acceptable evidence styles, structure and content will be provided to your team.

Regulatory compliance is an organization's adherence to laws, Federal regulations, statutory requirements, guidelines and specifications relevant to its business processes. Violations can, and often do, result in legal punishment including federal fines. You can conduct your own in-house assessments, but at the end of the day, will you truly know where you stand?

The experts at Abidance are seasoned assessors & auditors in multiple regulatory and statutory requirements. The Abidance assessors & auditors are fully versed in what is expected from each requirement.

The fixed-fee pricing for the Risk Assessment depends on the regulatory compliance and/or statutory requirement program you want to have assessed, the number of assessments you need.
