Caterpillar Crawl Clues

1. Welcome to the caterpillar crawl, we really hope you find them all! We know you're ready for some fun, so let us start with number one. At the Farmer's Market is where to look, near the mural on his book.
2. Next, head to Carter Family Way; he's there eating an apple today. At the bank is where he'll be found, behind a column, on the ground.
3. Now, walk past Seventh Street if you dare, and you will find him on a pear. He's on the corner, sitting on a brick...spotting him is the only trick.
4. Keep heading down State Street towards the Bristol sign. Don't worry about a thing, you are doing just fine. Look high, look low, but don't look glum. He's at 606 snacking on a plum.
5. To find our caterpillar number five, go where you'd see performances live! On a sweet strawberry he can be found, it's easy to spot him...just look down.
6. Now, cross the road into VA, but please be safe while on your way. When you get to the corner, please look to your right; the caterpillar is there; he's in plain sight.
7. Back up State is the way to go, our caterpillar friend is moving slow. Behind a column on a cupcake, feeling full with a big tummy ache!
8. Next, take a right onto Moore Street and stop in front of a place to eat. Look down low and look up high, he is there eating a piece of pie.
9. Our caterpillar's tummy is really full, and he's moving, slow, slow, slow. His next stop is at the Country Music Museum, maybe to see a show.
10. Take a left at Cumberland and head up the block to a place for a coffee and macaroon. Our caterpillar friend has changed quite a bit and is now in a cocoon.
11. Our walk around Bristol is almost done, and we hope that you have had great fun! The time we've spent has flown by, and now we have a butterfly! Where's the final spot to look? Same place you'd go to read a book!
