

Certificate of Veterinary Inspection Information Form

We use **Global Vet Link** for domestic and international travel to Canada and Mexico. Please fill out this form and email it back to us at thveterinary@gmail.com at least 24 hours prior to your inspection appointment.

Most US States require animals to be inspected within 10-30 days of travel. You can visit <https://animalregs.com/> to view requirements for each state or <https://www.aphis.usda.gov/pet-travel> for international travel.

OWNER:

Name or Name of Organization: _____
Address: _____
Phone: _____
Email: _____

(Required for international travel to most countries/ May be required for some states)

MOST STATES REQUIRE PETS OVER 12 WEEKS OF AGE TO BE VACCINATED AGAINST RABIES AND SUBMIT THEIR OFFICIAL RABIES CERTIFICATE FOR TRAVEL (Other states require rabies at 16 weeks of age)

RABIES CERTIFICATE: *Required for pets 3 months of age and older*****

Date Administered: _____

Vaccination Expiration Date: _____

Vaccine Type: (Killed or Recombinant) _____

Exposure: (Initial Dose or Booster Dose) _____

Manufacturer: _____

Product Name: _____

Lot/Serial Number: _____

Lot/Serial Expiration: _____

Please send a copy of the pet's rabies certificate in this email. If we are giving the rabies here during the inspection appointment, we will create the rabies certificate and submit it for you. Keep in mind for most international travel, most countries have a 20-30 day waiting period for travel after the rabies vaccine is given.

Additional Question (asked by some states): **Are these animals being imported into PACFA licensed facilities?** (yes or no): _____

VACCINATION HISTORY: We highly suggest all pets 6 weeks and older be current on their DHPP or DHLPP-C vaccines, as well as all pets 8 weeks and older be current on their bordetella vaccines. These vaccines are not required for domestic travel but are HIGHLY recommended. If we need to update any vaccines please let us know.

TESTING HISTORY: Some states or countries may require testing. Please review the requirements for the animal's destination. Tests such as fecal floats, heartworm tests, or 4DX tests can be run the same day as the animal's inspection and noted on the certificate of veterinary inspection. (4DX tests check for heartworms and three tick-borne diseases). Some rescues may require these tests (or any other tests), every state has different requirements.

Travel Timelines for Canada and Mexico (BEFORE DEPARTURE):

CANADA:

- ☐ Animal must be 84 days old on date of travel (~2.8 months old)
- ☐ If primary/initial rabies vaccine, it must be administered within the last 365 days.
- ☐ If booster dose, rabies vaccine must be current and administered within the last 1092 days. (3 years).

MEXICO

- ☐ Animal must be 84 days old on date of travel (~2.8 months old)
- ☐ Primary/initial rabies dose MUST be administered within the last 365 days AND at least 30 days before departure.
- ☐ If booster dose, rabies MUST be current AND administered within 1092 days. (3 years)

Download the [GVL MyVetLink app](#), where you have 24/7 access to your health certificates and other documents. To join MyVetLink as an animal owner or agent (trainer, stable owner, transporter, etc.), ask your GVL veterinarian to grant you access. Learn more at www.myvetlink.com.
