

DELMarine Environmental Policy

1. Mission Statement

DELMarine d.o.o. provides expert marine consultancy and superintendent audit services to the global shipping industry.

We acknowledge our responsibility to protect the marine environment and are committed to minimizing the ecological footprint of our operations and the vessels we audit.

We are also committed to maximizing our positive influence on the global shipping industry's transition to a sustainable future.

2. Purpose

This Environmental Policy is designed for a maritime consultancy where the primary environmental impact is split between **office operations, global travel,** and **influence** exerted during shipboard audits and inspections.

With a dedicated team of Marine and Technical Superintendents conducting on-board vessel audits globally, we recognize that our primary environmental impacts stem from business travel and the influence our technical advice has on client vessel operations.

3. Scope of Application

This policy applies to all **DELMarine d.o.o** employees, including our shore-based support staff and our team of superintendents conducting on-board audits and inspections as well as dry-docking supervision.

4. Responsibility and Leadership

The Director of **DELMarine d.o.o.** is responsible for ensuring this policy is implemented. Our superintendents are empowered to identify and report environmental risks encountered during their field assignments.

All employees are expected to adhere to this policy and contribute to our environmental goals.

5. Core Commitments

In accordance with ISO 14001:2015 and ISM Code, DELMarine d.o.o. is committed to:

- **Protection of the Environment:**

Preventing pollution and minimizing the environmental impact of our global travel, on board and office-based activities.

- **Compliance Obligations:**

Meeting all applicable legal requirements, including **IMO MARPOL** standards, national environmental laws, and specific port state regulations encountered during audits.

- **Environmental Awareness:**

Educate, train and motivate employees and contractors to carry out task in an environmental responsible manner.

- **Strategic Energy Management & Operational Efficiency:**

Have a holistic view on energy management and implement energy saving initiatives, devices and operational best practices.

- **Continual Improvement:**

Regularly reviewing our Environmental Management System (EMS) to enhance environmental performance.

All employees are expected to adhere to this policy and contribute to our environmental goals.

6. Communication

This policy is communicated to all employees and contractors and is made available to interested parties, including clients and regulatory bodies, via the Company Website and official company profiles.
