DISCLAIMER: ppm = Parts Per Million, ppb = Parts Per Billion, "<" = "less than", ">" greater than", NT = Not Tested, ND = Not Detected, LOD = Limit of Detection, LOQ = Limit of Quantitation, TNTC = Too Numerous To Count, RSD = Relative Standard Deviation. This report of analysis may not be modified in any way, or reproduced except in full, without written approval from CATLAB, LLC. Results as reported relate only to samples as submitted on the chain of custody. All sample results are based on samples as they are received. Not all potential/existing hazards were tested. Unless otherwise noted, analyses were performed without significant modifications and QC met the quality standards outlined in the methods reported. Measurement uncertainty is available upon request. Unless required, measurement uncertainty is not applied when making statements of conformity. The Limit of Quantitation (LOQ) is the lowest level of an analyte that can be accurately recovered from the matrix of interest. Analytes may be present in samples at concentrations lower than RL. The Regulatory Limits (or Action Levels) for adult use mandatory testing samples are set by the Maine Office of Cannabis Policy (OCP). Total THC = D-9-THC + (THCA x 0.877). Total CBD = CBD + (CBDA x 0.877).
