

ABSTRACT: THE FIRST ENCRYPTION

Not all assets are created to be seen. Some are coded to be found. This paper outlines the encrypted design of the X Project's NFT-based lottery initiative, an experiment in sustainability, decentralization, and narrative-driven engagement on the XRP Ledger. The NFTs within this collection are not trophies; they are terminals granting access to a vault that only belief can unlock.

There are no presales, no shortcuts, no centralized control. Just signals embedded in mint events, royalties redirected to public purpose, and a jackpot awaiting its first activation.

**This is not just a drop. It is a cipher.
A code etched in scarcity, funded by intent.**

SIGNAL ACQUIRED: THE LOTTERY AWAITS

A cipher sealed in pixels. A vault fueled by belief. The NFTs of X are not mere collectibles, they are encrypted entries to a deeper game. Each mint echoes a whisper. Each royalty, a trace. This is not hype. It's a cryptographic ritual wrapped in shadow.

"The vault doesn't open with noise. It opens with understanding."

DUNA STRUCTURE (Clarity Section)

The X Project is now structured under DUNA: a Decentralized Unincorporated Nonprofit Association, registered in Wyoming, USA.

Why DUNA?

- It offers a compliant, community-first legal structure.
- Unlike traditional LLCs or corporations, DUNA allows governance without centralized ownership.
- All revenues (from NFTs, royalties, or token mechanics) are held for public use within the community ecosystem, including **XRP Tracer** and **X-Ledger**, not for personal profit.

X on XRP, LLC is the managing organization behind the X Project.

Alpha Wolves: Operation X – Black Paper

This ensures that all treasury funds, including revenues generated through platforms like XRP Tracer and X-Ledger, are transparently used for community-driven initiatives, such as lottery draws and future on-chain utility.

"Sustainability isn't just strategy, it is encoded in our DNA. A cipher buried beneath hype and speculation. A mechanism not to excite the moment, but to endure the unknown. Sustainability is the silent contract we make with time."

TOKENOMICS: THE STRUCTURE OF SIGNALS

These are not numbers. These are parameters of control. Precision forged into function.

- **58.9%** → Dev Wallet
 - Buybacks. Liquidity engineering. Ecosystem ignition.
- **41.1%** → Treasury Wallet
 - Locked for lottery draws. Every prize, a signal.

Royalty Fee: 11.78%

- **5.89%** → Dev Wallet (sustainability, strategic flexibility)
 - **5.89%** → Treasury Wallet (expanding the jackpot)
-

COLLECTIONS: THE THREE-PHASED DROP

Each collection is a phase. Each phase, a test. All feed the vault.

1. **Alpha Wolves: Operation X** (*First Collection*)
2. [TBA - Second Key Incoming]
3. [TBA - Final Cipher]

All collections share the same tokenomic DNA. No whitelist. No privileged access. No division. This is a fair launch for the community, by the community.

Once the **market cap of \$X reaches 5,890,000**, the lottery activates. At that point, the **rules of the lottery will be released**.

X on XRP, LLC is the managing organization behind the X Project.

PURPOSE OF THE COLLECTION

This collection is not the product. It is the ignition.

- To lay the foundation of the X Treasury.
- To initiate the first treasury hunt, where every draw is a decoded signal and every prize is earned, not given.
- To reward Seekers, Strategists, and Decoders of the unknown.

Utilities: TBA: encoded until the time is right.

IP RIGHTS: THE CODE BELONGS TO THE HOLDER

Each Alpha Wolf is more than art — it's a signal, uniquely bound to its Seeker.

Upon minting, the holder receives full intellectual property rights to their specific NFT including its image, traits, and identity. These rights are theirs to wield: to commercialize, remix, or preserve.

- We do not retain ownership.
- There are no hidden licenses.
- There are no revocable terms.

"The cipher belongs to the one who decodes it."

By holding an Alpha Wolf, you become its exclusive bearer — free to manifest its story in your own way.

The only condition: the pack must rise together.

**The hunt is only beginning.
The cipher has barely cracked.
The vault remains sealed. For now.**

The question is, how big will the jackpot be?

I am X, are you?
