

## NOTICE

Patients who fail to keep two appointments in a row (“no-show”) with the doctor will not be permitted to schedule additional appointments. This may also be true if there is a pattern of missed appointments that are not back-to-back.

You may come to the office and wait to see if there is a cancellation or no-show, at which time you may be seen in place of the scheduled client.

After either being seen twice without an appointment if you want to resume scheduling appointments you must clear this with your healthcare provider.

In an emergency situation, you are always encouraged to call 911 or go to the emergency room at your closest hospital.

Your healthcare provider may have determined that regularly attended visits are necessary in order to continue receiving medication management services. Your prescriber will let you know if this will be required for you.
