We think our Special Guests are FUN-Tastic. Here is some information and links to check them out!

Bubble Show Jay Jay the Bubble Guy will bring science and magic together in his performance. He will put the children inside a MEGA bubble, create a bubble wall, and balance bubbles one on top of the other. The children will learn about cause and effect through this engaging show. Jay Jay's performance will surely make science "pop" for the kiddos. Check out his website for more information <http://www.jayjaytheballoonguy.com/dj.html>

Snakes-Scales-N-Turtle Tales. Through live animal presentations, the children will have the opportunity to meet rescued animals and learn about their habitat. A close encounter on the wild side is exciting for all in attendance! To get a sneak peek of some of the animals, click the link <https://snakes-n-scales.com>

Dinosaurs Rock Exhibit Dinosaurs Rock and so does this special guest! The gym will be transformed into a museum with an interactive display. As the children participate in this hands-on activity, they will be awed as they uncover genuine dinosaur bones, shark teeth, ammonites, petrified wood and more. Best of all, they will be taking some fossils home for the start of their own collection. The children will surely "dig" this special guest. Click the link for some more information <http://dinosaursrockprograms.com>

Travelin' Tumblers Using lively music, innovative gymnastics equipment and energetic instructors, Traveling Tumblers boost children's fitness levels and self-esteem through diverse & enriching physical activities. Traveling Tumbler instructors get the children moving and having fun. Check out their website for some videos. <https://travelintumblers.com>

Put some STEAM into your Preschool with High Touch High Tech! High Touch High Tech of Northern New Jersey continues to nurture budding young minds with innovative early childhood programs designed to challenge & amaze preschool age children. These programs encourage your students to expand their thinking and problem-solving skills with many opportunities for both individual and collaborative projects. During Mission Impossible, Dino Diggers, and STEAM Ahead, High Touch High Tech will provide opportunities to introduce the campers to science and nature in a fun, engaging way!

Safari Adventure with Professor Stan Livingston and his amazing puppets on a journey into the animal kingdom. There's a little information, along with a little magic and a little juggling and a lot of zany antics. Professor Stan brings a panda, a lion, an ostrich, a ten foot long snake, an insect too small to be seen, a barrel of monkeys and a barrel of laughs. An encounter with wildlife has never been this wild! Puppeteer and former Ringling Circus clown and high-end entertainer invites Village to go along on the Imaginary Safari!

Gymnastics and Yoga with Head to Toe Activities on the Go Weekly a yoga and gymnastic instructor will visit VECC! During Yoga, the kiddos will have fun and get moving! Along with aerobics & music, they will practice a variety of yoga moves such as downward dog, moon, tree, and lion. Namaste and have some fun! The gymnastic classes will cover stretching, jumping, agility, landing and tumbling to name a few skills. We will surely be "swinging" with excitement with each new skill mastered.
