

Setauket PTA Presents

Setauket Elementary 21st Annual Science Fair

Thursday, March 21, 2024, 6 - 8 pm
Setauket Elementary School
All Grades Pre-K to 6

Time to Experiment!

*Sign up to show your project to our real scientist judges
Prepare a science project as simple or as elaborate as you want
Participate in hands-on activities and watch the exciting science demonstration*

Everyone is Welcome!

*Check out your friends' awesome projects or just come for the activities and
thrilling science demonstration*

Scan this QR code and sign up by **March 8, 2024**

Any question, please email Sujatha Gurunathan and Barbie Chen
setauketsciencefair@gmail.com

*** See reverse for Getting Started Tips ***

Getting Started Tips

1. Think of a science project topic that interests you or find ideas from the following resources:
 - www.sciencebuddies.org
 - Emma Clark Library has books with cool science experiments and step-by-step instructions. Ask the Emma Clark librarians where you can find books on science experiences.
 - Setauket Elementary library: check out the display featuring books on science fair projects and ask Ms. Lauria about them.

2. Use the Scientific Method to answer your question:
 - Ask a question
 - Research your topic
 - Form a hypothesis (educated guess)
 - Conduct an experiment or test your hypothesis
 - Analyze your data
 - Report your results

3. Display your work on a tri-fold poster board - use one or more of the following sections:
 - Background - Why is the question interesting?
 - Question - What is your question?
 - Method - How is the experiment done? What materials are used?
 - Results - What did you learn or see?
 - Conclusion - Do you now know enough to answer the question? If so, what is the answer? If not, what can you do next?

We welcome participation at ALL levels!

* We encourage parental support in gathering supplies, etc. but remember that it's a science fair for students and their projects. Nothing is too simple!
