

# The Field of Dreams Academy

April 2025

www.fieldofdreamsacademy.org

## Welcome Academy Parents, Players & Coaches

### It is Springtime!

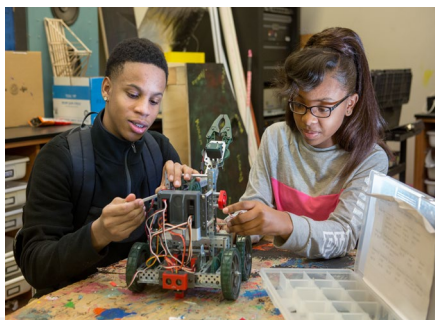

We are so excited about the various academic and athletic enrichment programs and activities planned for this spring.

**STEM** Science, Technology, Engineering, Mathematics **Camps:**

We are so excited to announce our thirteen annual GENIUS Science and Math Camp! Since its inception, we have had over four hundred campers participate in our eight-week session. What makes our camp so unique and engaging is our instructors, and how they introduce diverse fields of engineering; through various concepts, theories and interactive skill building programs by incorporating technology, field experiments, and classroom lectures.

Our goal is to develop the next generation of scientists, engineers, inventors, and leaders from our community.

### *Audacity to Dream!* It is our 20<sup>TH</sup>

**ANNIVERSARY!** We need your support, and please donate today.

Our goal is to simply provide opportunities and help shape tomorrow's leaders. We are focusing our energy to expand our diverse enrichment programs to serve more youth in the underrepresented communities of Atlanta, Los Angeles, and Washington D.C. Our strategy is to improve the quality of life for each participating youth and their community by providing an innovative and unrestrictive environment where there are no bounds for their creativity and critical thinking skills can develop. Our youth participate in various STEAM based – academic, athletic, and character development enrichment programs that challenge, inspire, and engage them to dream.

We are so excited to announce our partnership with the **National Summer Learning Association and AT&T. The Achievery by AT&T is a free digital learning platform** designed to provide enhanced online learning opportunities for all K-12 students. The Achievery offers students **over 500 entertaining videos and clips of engaging, educational online content by delivering top-tier digital learning resources and a curated library of popular entertainment** paired with lesson plans and activities designed by education experts across seven academic subject areas.
