

STEAM ROBOTICS CAMP

The field of robotics is driving new technology and changing the way we live, work and play! Mechanization of everything from self-driving cars to creation of new energy sources can all trace their origins in robotics and mechanical engineering.

Imagine a day camp that is designed to offer students an opportunity to learn and explore their mechanical minds by allowing them to imagine, design, and create robots that will uniquely address today's scientific and technological innovations...through different experiments and projects like Video Game Creation, Robotics, Veterinary Medicine, Crime Scene Investigation, Culinary Science, Paleontology, Engineering, Space, Biology, Chemistry, Oceanography, LEGO Robotics and much more.

Students will engage in hands-on experiences that stimulate communication, creativity, collaboration, and critical thinking.

Come Join us at our **STEAM Robotics Camp**

Date: **Sat. March 21, 2026**

Time: **10:00AM to 3:00 PM**

Location: **Piedmont Park**

1320 Monroe Dr., NE ATL, GA 30306

Grades: 3rd to 12th Age Group: 8 - 18 years old

FREE
