

CHANGE IN PROFESSIONAL CONSULTANTS & STRATEGIC PARTNERS COMPENSATION

EFFECTIVE JULY 29, 2025

As we pivot to lead with our PROACT PSAs about consumer and patient rights to control their own health records, our models have changed. Our payments are based first on consumer and patient subscriptions to their Health Records alone or bundled with unlimited virtual care.

1. You will receive \$2 per subscriber per month for health records
2. And an additional \$1 if they upgrade to add unlimited virtual care
3. I HIGHLY suggest in either case that we give the provider, ACO or other lead source \$1, and you keep the balance.

What's Next?

When providers or partners offer the FREE Precision Health Access phone app and manual health records download, they can choose to make this a billable encounter. Our charge is \$12 per insurance paid and \$8 for ACO/Medicare Advantage or patient pay. They are required to make this offer and benefit compliance and clinically from the responses.

Payments are collection-based as follows;

1. 10% to a single outside billing source to assure payment
2. Precision splits 50/50 of that net receivable
3. Strategic Partner or Rep gets 15% of Precision's net
4. This same protocol applies when the provider chooses to continue this "Pilot" to gain the missed compliance-based revenue shown on their CMS/Payer Report Card.

As part of their incentive the provider will receive their CMS/Payer Report Card – Sample Below

- They keep 100% of this revenue,
- You keep 100% of your normal commissions from the service vendor
- Precision does not share this revenue, though our platform generated the medical necessity to engage facilitate delivery and payment for the service.

How Do I Grow My Business Under This Model – FAR easier than ever before!
