Compressors and Equipment

**Oil-Flooded Rotary**  
Fixed Speed  
Variable Speed

**Remote Monitoring**  
Compressed Air Systems  
Generators

**Packaged Systems**  
Modular Systems  
Skid Systems

**Hydraulic Design and Repair**  
Parker Store  
Hydra-Tech Jacks

Dryers, Condensate Management, Filtration and System Components

**Refrigerated Dryers**  
Non-Cycling Direct Expansion  
Cycling Thermal Mass

**Desiccant Dryers**  
Heatless – Heated  
Blower Purge  
Heat of Compression

**Tanks**  
ASME Receivers

**Condensate**  
Oil Water Separators  
Auto Drains

**Filtration**  
Breathing Air  
Purifiers

Engineered Systems

UptimeRMX Remote Monitoring

**UPTIME**  
RMX

UptimeRMX provides cloud-based diagnostics and analytics for dependable wireless remote system monitoring – delivering greater reliability, improved air quality and lower overall costs of operation. This patent pending system was uniquely developed for, and by, dedicated service professionals.

# Equipment | Parts | Service | Rental | Engineering Service and Agreements

### **Service and Support**

APS service team offers a top-level service provided by highly skilled technicians. Our service and parts rates are very competitive in comparison of the market. Customer satisfaction is of our highest priority. We can fully support any brand of compressor and system components.

### **Preventative Maintenance Programs**

APS provides a thorough preventative maintenance approach. With this approach we believe most potential problems can be identified during our service and corrected before the compressed air system fails. We understand the compressed air system is a valuable asset to our customers and with a malfunctioning system it can lead to costly loss of production.

## Additional Services

### **System Assessment and Ultra-Sonic Leak Detection**

What is a system assessment? A system inspection includes a complete inspection of the compressed air system as a whole. APS will thoroughly inspect compressors, dryers, tanks, drains and system components including piping system for adequate and efficient operation, and perform a Ultra-Sonic Leak inspection to identify costly leaks. A full detailed engineering report will be provided once the assessment is completed. The APS engineering and service team will work directly with your team to build a plan to address any findings.

### **Tool Design and Fabrication**

Engineering  
FEA Analysis  
Machine Shop  
3D Proto-Type Printing

### **Compressor and Yard Air Design and Installation**

Full engineering, installation and service provider for your compressed air and yard air system needs.

## Rental Equipment

### **Local Source for your Rental Equipment**

Including Oil Free and Oil Flooded Electric or Diesel Air compressors, Dryers, Chillers, Cooling Towers, Generators, Hydra-Tech Jacks and more

## Parts and Lubricant

### **For all Makes and Models**

Air Production & Service offers a large selection of Air Compressor parts and lubricants for any air compressor and system component. Our products are of the highest quality and most times at a lower cost than OEM. Contact us today for a parts quote.

## Hydraulic & Crimped Solutions

### **Yard Air Runner Hoses**

### **Jack Certification, Service and Repair**
