

SAMPLE QUESTION PAPER - 1
Computer Applications (165)
Class X (2024-25)

Time Allowed: 2 hours

Maximum Marks: 50

General Instructions:

1. This Question Paper has 5 Sections A-E.
2. All Questions are compulsory. However, an internal choice of approximately 30% is provided.
3. Section A has 12 questions carrying 01 mark each.
4. Section B has 7 Very Short Answer (VSA) type questions carrying 02 marks each.
5. Section C has 4 Short Answer (SA) type questions carrying 03 marks each.
6. Section D has 1 Long Answer (LA) type question carrying 04 marks.
7. Section E has 2 Source based /Case-based /Passage based Questions carrying 04 marks each.

Section A

1. Which of the following should be done to prevent hacking? [1]
 - a) Install anti spyware software.
 - b) Use an updated antivirus software.
 - c) Install a Firewall.
 - d) All of these
2. A collection of Web pages linked together in a random order is [1]
 - a) a Web server
 - b) a search engine
 - c) a Web browser
 - d) a Website
3. In which of the following fraud, fraudster using a stolen credit card? [1]
 - a) Identity theft
 - b) Friendly fraud
 - c) Merchant fraud
 - d) Refund fraud
4. In this technique, there is no direct contact between users and their programs during execution: [1]
 - a) Time sharing
 - b) Batch processing

c) Message passing

d) System processing

5. The first network was: [1]

a) NSFNet

b) Internet

c) ARPANET

d) NET

6. Which type of tags are used by HTML? [1]

a) Tags only for linking

b) Tags only for image

c) Fixed tags defined by the language

d) User defined tags

7. Which of the following tags contains the Title tag? [1]

a) BODY

b) HEAD

c) LIST

d) TABLE

8. Which property is used to give the specified spacing between the text characters? [1]

a) Text Design

b) Text Transform

c) Text Decoration

d) Letter Spacing

9. _____ is the default color of a hyperlink. [1]

a) Blue

b) Green

c) Red

d) Black

10. The general syntax for adding inline image to HTML document is: [1]

a) <imgsrc = "filename">

b)

c) <srcimg = "filename">

d)

11. **Assertion (A):** Line spacing between the lines of text can be given using the Line Break (
) tag. [1]

Reason (R): Title attribute changes the default colour of the hyperlink. It is used inside the <Body> tag.

a) Both A and R are true and R is the correct explanation of A.

b) Both A and R are true but R is not the correct explanation of A.

c) A is true but R is false.

d) A is false but R is true.

12. **Assertion (A):** The Background color attribute of the Body tag specifies the background colour of a web page. [1]

Reason (R): The Body tag is a container tag, i.e., it has both, an ON tag and an OFF tag. It contains all the text and images that make up the page.

a) Both A and R are true and R is the correct explanation of A.

b) Both A and R are true but R is not the correct explanation of A.

c) A is true but R is false.

d) A is false but R is true.

Section B

13. What do you understand by google groups? [2]

14. Why do we need computer networks? [2]

OR

What is e-learning?

15. In which tag, <LINK> element can be used? [2]

16. Anjali is confused between freeware and shareware software. Help her understand the difference by giving atleast two points for each. [2]

OR

What is cyberbullying?

17. Mention the use of <option> tag. [2]

18. Find the error(s) in the following code and underline those errors. [2]

```
<HTML>
<HEAD>
<TITLE> Example </HEAD>
</TITLE>
<BODY>...</BODY>
</HTML>
```

OR

What happens when we click on a hyperlink in a web page?

19. Name different control types supported by HTML forms. [2]

Section C

20. Mention any three advantages of intellectual property rights. [3]
21. Mention some of the positive impacts of e-governance in the society. [3]
22. Write an HTML code to create a password field. [3]

OR

Write an HTML code of a web page using CSS.

23. What is the digital divide? Write any two reasons for digital divide in India. [3]

Section D

24. How to embed audio and video in a Web page? [4]

OR

Explain the <HEAD> tag.

Section E

25. Read the text carefully and answer the questions: [4]

Linking: A key feature of the HTML is its ability to link text and/or an image to another document or within a document. If you are on a web page and see the coloured and/or an underlined text, it is a hyperlink. By default, colour of a hyperlink is blue. The main objectives of linking are as follows:

- i. To add more pages to the website and link them together.
- ii. Using internal links (anchors) to save scrolling for visitors.
- iii. To indirect the user to web page of different website.

In other words, hyperlinks are the links that carry user from one web page to another (within or on another website). It is activated by clicking on an underlined text or image.

- (i) What is the default colour of a hyperlink?
- (ii) Name the tag used in HTML to link a web page with other web page.
- (iii) Define anchor tag.
- (iv) What do you mean by HREF in HTML?

26. Read the text carefully and answer the questions:

[4]

Rashmi is a student of ABC School. She has been provided with an email id from the school to use for all academic correspondences. She generally receives all her school's correspondences on this email.

One day she was working in the computer lab, and after her work was over, she forgot to logout of her email account. When she left the computer lab, her classmate, Prabhnoor sends objectionable emails from the same email id, to her teachers, so as to malign Rashmi.

- (i) Prabhnoor has invaded _____ of Rashmi.
- (ii) Rashmi informs her class teacher about the incident. The teacher calls Prabhnoor and makes him aware of _____, which is following ethical principles while working online.
- (iii) The teacher also advises all students never to share their _____ with anyone.
- (iv) Rashmi has learnt that she should always _____ of her email account once her work is complete.

Solution
SAMPLE QUESTION PAPER - 1
Computer Applications (165)
Class X (2024-25)
Section A

1.
(d) All of these
Explanation:
All of these
2.
(d) a Website
Explanation:
A Website is a collection of Web pages linked together in a random order and displays related information on a specific topic.
3.
(d) Refund fraud
Explanation:
In refund fraud, fraudster using a stolen credit card makes an overpayment on purpose.
4.
(b) Batch processing
Explanation:
Batch processing
5.
(c) ARPANET
Explanation:
ARPANET
6.
(c) Fixed tags defined by the language
Explanation:
Fixed tags defined by the language
7.
(b) HEAD
Explanation:
HEAD
8.
(d) Letter Spacing
Explanation:
Letter Spacing

9. (a) Blue

Explanation:

Blue

10. (a) <imgsrc = "filename">

Explanation:

<imgsrc = "filename">

11.

(c) A is true but R is false.

Explanation:

A is true but R is false.

12.

(d) A is false but R is true.

Explanation:

A is false but R is true.

Section B

13. Google groups is one of the most popular search engine to find information about people. It has incorporated over 800 million Usenet messages into its database.

14. i. Networks enable resource sharing across the globe.

ii. Networks provide high reliability by having alternate copies of data. Presence of multiple CPUs means that if one goes down, the others may be able to take over its work. This ability to work in the face of hardware problems is of utmost importance in military, banking, air traffic control, nuclear reactor safety, etc.

iii. Networks enable a client/server model with clients as small computers, one per user, with data kept on one or more shared file server machines. Eg. Software installation can be on server and this can save cost of buying license for every machine.

OR

E-learning is the term used to explain the scenario where teaching-learning process takes place online using the Internet and communication technology. It is the use of technology to enable people to learn anytime and anywhere.

15. The <LINK> element goes inside the <HEAD> section.

16. Freeware	Shareware
It is available free of cost and allows copying and further distribution.	It is available free of cost for certain period of time, then a license fee should be paid. It has right to redistribute copies.
Modifications and source code are not available.	Modifications and source code are also not available.

OR

Cyberbullying involves abuse of another person using threats, insults and hurtful remarks and messages over the internet. There have been numerous reports of people who have been driven to suicide by persistent cyberbullying.

17. The <option> tags inside the <select> element defines the available options in the drop-down list.

18. <TITLE> should be placed before </HEAD>

The correct code is:

<HTML>

<HEAD>

<TITLE> Example </TITLE>

</HEAD>

<BODY> </BODY>

</HTML>

OR

When we click on a hyperlink in a web page, it provides a link that leads from one document to another.

19. i. Buttons

ii. Check boxes

iii. Radio buttons

iv. Menus

v. Password

vi. Text input

vii. Hidden controls

Section C

20. Advantages of intellectual property rights are as follows:

i. Encourages individuals to distribute and share information and data instead of keeping it confidential.

ii. Provides legal defense and offers the creators the incentive of their work.

iii. Provides exclusive rights to the creators or inventors.

21. The positive impacts of e-governance are:

i. E-governance has benefitted people by reducing cost and time for various services.

ii. It has reduced corruption in the government.

iii. It has made government administration more transparent and accountable.

22. <html>

<head>

```

<title> Password Field </Title>
</head>
<body>
<form>
User Id : <input type="text" name="userid"/>
<br><br>
Password<input type="password" name = "pswrd" value="password"/>
</form>
</body>
</html>

```

OR

```

<HTML>
<HEAD>
<TITLE>Example Web Page</TITLE>
<STYLE>
H1 {
FONT-FAMILY: comic sans ms, cursive, serif;
COLOR:red;
BORDER-BOTTOM: 1px dotted dark green;
}
P {
FONT-FAMILY: sans-serif; COLOR: orange;
}
</STYLE>
</HEAD>
<BODY>
<H1>HTML Document using CSS</H1>
<P>This is a basic HTML document. This uses CSS.</P>
</BODY>
</HTML>

```

OUTPUT

HTML Document using CSS

This is a basic HTML document. This uses CSS.

23. Digital divide refers to the differing amount of information between those who have access to ICT and those who don't have access.

Reasons:

- i. Due to the unequal distribution of wealth, poverty is higher in rural areas.
- ii. Less literacy rate in rural India.

Section D

24. Embed Audio Element

The HTML `<AUDIO>` element is used to embed sound content in documents. It may contain one or more audio sources, represented using the `src` attribute. The `<AUDIO>` element defines an in-browser audio player. The audio player can provide a single piece of audio content. To specify the source file of the audio content, use one or more `<SOURCE>` elements inside the `<AUDIO>` element. All `<SOURCE>` files should contain the same audio content, but in different file formats. The browser will select the first file format that it is able to play. If you are not going to provide multiple source file formats, you may indicate the source file in the `src` attribute, instead of in a separate `<SOURCE>` element.

e.g.

```
<HTML>
```

```
<BODY>
```

```
<AUDIO controls autoplay>
```

```
<SOURCE src = "/html/audio.ogg" type = "audio/ogg"/>
```

```
<SOURCE src = "/html/audio.wav" type = "audio/wav"/>
```

Your browser does not support the `<AUDIO>` element.

```
</AUDIO>
```

```
</BODY>
```

```
</HTML>
```

Output

Embed Video Element

The `<VIDEO>` element allows us to embed video files into an HTML document, very similar to the way images are embedded. The HTML does not specify which video formats browser should support in the `<VIDEO>` tag, but most commonly used video formats are ogg, mpeg4.

e.g.

```
<HTML>
```

```
<BODY>
```

```
<VIDEO width = "300" height = "200" controls autoplay>
```

```
<SOURCE src = "/html/foo.ogg" type = "video/ogg"/>
```

```
<SOURCE src = "/html/foo.mp4" type = "video/mp4"/>
```

Your browser does not support the <VIDEO> element.

```
</VIDEO>
```

```
</BODY>
```

```
</HTML>
```

Output

OR

This element is a container for all the header elements. The <HEAD> tag must include a title for the document that can include scripts, styles, meta information and many more. The second line of your HTML document should be <HEAD>.

The content contained in the head section of your document provides information to the browsers and search engines but, it is not displayed directly on the Web page. The end of the head tag is indicated by </HEAD>.

e.g.

```
<pre><HTML>
```

```
<HEAD>
```

```
//Header information comes here</HEAD>
```

```
</HTML>
```

Section E

25. Read the text carefully and answer the questions:

Linking: A key feature of the HTML is its ability to link text and/or an image to another document or within a document. If you are on a web page and see the coloured and/or an underlined text, it is a hyperlink. By default, colour of a hyperlink is blue. The main objectives of linking are as follows:

- i. To add more pages to the website and link them together.
- ii. Using internal links (anchors) to save scrolling for visitors.
- iii. To indirect the user to web page of different website.

In other words, hyperlinks are the links that carry user from one web page to another (within or on another website). It is activated by clicking on an underlined text or image.

(i) Blue colour

(ii) <A>

(iii)The <A> tag defines a hyperlink, which is used to link from one page to another.

The most important attribute of the <A> element is the href attribute, which indicates the link's destination.

(iv)The HREF attribute specifies the URL of the page the link goes to. If the href attribute is not present, the <A> tag will not be a hyperlink.

26. Read the text carefully and answer the questions:

Rashmi is a student of ABC School. She has been provided with an email id from the school to use for all academic correspondences. She generally receives all her school's correspondences on this email.

One day she was working in the computer lab, and after her work was over, she forgot to logout of her email account. When she left the computer lab, her classmate, Prabhnoor sends objectionable emails from the same email id, to her teachers, so as to malign Rashmi.

(i) Mailbox/EmailID

(ii) Cyber Ethics

(iii) Credentials

(iv) Logout
