SECTION A – READING SKILLS

1. Read the text carefully and answer the questions:

[10]

1. The role friends play in our lives has become significantly greater now than at any other time in our history. Today many of us live and work great distances from where we were born or have grown up & are separated from our original families. The pain we feel when we are away from our families can be significant.
2. The happiness of the individual relies on friendships that form a necessary human connection. It is perfectly normal to need and want friends and depression is more prevalent among those who lack friends. They lack the intimacy and richness friends can bring into our lives. Frequently friends reflect similar values to us. Yet these values are often different from the ones we grew up with; they are the values we created for ourselves in our adult lives.
3. Communication skills are fundamental in all friendships. The more friends and acquaintances one has, the greater are one's communication skills. Some call these, people skills.
4. Like watering a plant, we grow our friendships (and all our relationships) by nurturing them. Friendships need the same attention as other relationships if they are to continue. These relationships can be delightfully non-judgmental, supportive, understanding, and fun-filled.
5. Sometimes a friendship can bring out the positive side that you never show in any other relationship. This may be because the pressure of playing a 'role' (daughter, partner, or child) is removed. With a friend, you are to be yourself and free to change. Of course, you are free to do this in all other relationships as well but in friendships, you get to have lots of rehearsals and discussions about changes as you experience them. It is an unconditional experience where you receive as much as you give. You can explain yourself to a friend openly without the fear of hurting a family member. How do friendships grow? The answer is simple. By revealing

yourself; being attentive; remembering what is most important to your friend and asking them about it; put yourself in their position; showing empathy; seeing the world through the eyes of your friend, you will understand the value of friendship. All this means learning to accept a person from a completely different family to your own or perhaps someone from a completely different cultural background. This is why we have learned tolerance. In turn, we gain tolerance and acceptance for our own differences.

6. Friendships are made by being considerate which means all the communication skills come into play: active listening skills, questioning skills, negotiation skills, reflecting content skills, reflecting emotion skills and editing yourself.
 7. Friendships offer a great opportunity to learn about yourself because a friend can reflect back to you 'how you come across in the world'. They also allow you to practice skills in dealing with 'personal boundaries' by looking after yourself as well as your friend. They help you develop resilience in relation to the wider society that would be beyond your family.

Subject: Simple weddings better than exuberant ones

Sir,

Through the medium of this letter, I would like to express my concern over the meaningless display of wealth during weddings these days. In the present day, lavish weddings have become a trend. Hotels, farmhouses and banquet halls are booked months in advance. Even lower-middle-class families are entertaining more than a thousand guests and consequently, they have to pay debts for months and sometimes for years too. No stone is left unturned to fulfill the desire of pretentiousness of being affluent in front of society. There is no denying of the fact that a wedding is indeed an important occasion but this moment of joy should not become a burden for families. We need to invite only our relatives and close friends for a wedding. An overcrowded gathering only leads to chaos and unnecessary expenditure. It is always better to have a simple wedding ceremony and an amount can be set aside to give to the couple to start their new life.

I hope my letter gets some space in your newspaper so that, through this trusted medium, people understand that money should not unnecessarily be wasted on exuberant wedding celebrations but should be used to invest in building the foundation of a happy married life.

Yours sincerely

Ram

HEALTH FOR ALL

By Raunak

A complete health check-up camp was organized by an NGO in a slum of Amritsar on 15th February 20XX. The camp aimed to make the slum-dwellers aware of their ailments or other health problems so as to come up as a healthy being. The program started at 9 am in a local school nearby. A team of five doctors, along with paramedical staff, reached the venue in time. They first started the registrations where the persons were supposed to tell their age and general health. There were different counters where normal medical check-up, eye-test, etc. were done. The main focus was on making the people aware of illnesses caused by not taking care of hygiene and sanitation. They provided information to individuals about any kind of diseases they might be suffering from. Free medicines were distributed among the people and they were also made aware of the importance of follow up. The program was a huge success as they were given information about healthy food habits, clean and healthy surroundings in a lecture by Dr. Gautam. The response of the slum dwellers was overwhelming and they promised to follow the health-safety points given by the team.

7. Read the text carefully and answer the questions:

“The little old house was out with a little new shed
In front at the edge of the road where the traffic sped,
A roadside stand that too pathetically pled,
It would not be fair to say for a dole of bread,
But for some of the money, the cash, whose flow supports
The flower of cities from sinking and withering faint.”

8. Read the text carefully and answer the questions:

I cried aloud, shaking my head all the while until I felt the cold blades of the scissors against my neck, and heard them gnaw off one of my thick braids. Then I lost my spirit. Since the day I was taken from my mother I had suffered extreme indignities. People had stared at me. I had been tossed about in the air like a wooden puppet. And now my long hair was shingled like a coward's! In my anguish I moaned for my mother, but no one came to comfort me. Not a soul reasoned quietly with me, as my own mother used to do; for now I was only one of many little animals driven by a herder.

"I will learn to drive a car," he answers, looking straight into my eyes. His dream looms like a mirage amidst the dust of streets that fill his town Firozabad, famous for its bangles. Every other family in Firozabad is engaged in making bangles. It is the centre of India's glass-blowing industry where families have spent generations working around furnaces, wielding glass, making bangles for all the women in the land it seems.

Mukesh's family is among them. None of them know that it is illegal for children like him to work in the glass furnaces with high temperatures, in dingy cells without air and light; that the law, if enforced, could get him and all those 20,000 children out of the hot furnaces where they slog their daylight hours, often losing the brightness of their eyes.

Mukesh's eyes beam as he volunteers to take me home, which he proudly says is being rebuilt.

Read the text carefully and answer the questions:

M. Hamel went on to talk of the French language, saying that it was the most beautiful language in the world — the clearest, the most logical; that we must guard it among us and never forget it, because when a people are enslaved, as long as they hold fast to their language it is as if they had the key to their prison. Then he opened a grammar book and read us our lesson. I was amazed to see how well I understood it. All he said seemed so easy, so easy

- (i) patriotic magnification
- (ii) Franz had realized that French was the clearest and most logical language.

10. Answer any five of the following questions in 40-50 words each:

- (i) During one of his usual plodding, the peddler thought on the subject of ratttraps. It presented him with the idea of the world being a ratttrap and he grew fond of thinking this way.
- (ii) Life is all about living and let others live. Life should not have any associations with death. We fail to understand that world peace and harmony are hampered by our activities and it is time we think of some solution for the problems existing in the world. We have created a threat to humanity. Our life depends on our activities so we should just do constructive things by indulging in self-introspection.
- (iii) Man makes his life miserable and full of suffering because of his own actions. The pall of despondency is the sadness that is a result of what he does. A thing of beauty works wonders by removing the cover of gloom that engulfs man. We weave a flowery wreath to remind us of our connection to nature. But one often forgets this connection in the turmoil of life. Beauty lies in the lap of nature that can replenish our soul.
- (iv) Sophie did not meet Danny Casey in reality. She made up the story of her encounter with Danny Casey only to seek the attention of her brother, Geoff. She had to continue with her false story in front of Jansie as well. She was a day dreamer and kept on fantasizing about having a date with Danny Casey.
- (v) Subbu had many abilities. His four special abilities were as follows:
 - i. Subbu was a happy soul and he had the ability to look cheerful at all times.
 - ii. He was loyal and loyalty made him turn his entire creativity to his principal's advantage. Film-making was quite easy with Subbu around due to his nature.
 - iii. Subbu's literary talent ran to being a poet and novelist too. Apart from this, he was an amazing actor.
 - iv. He had a charitable and loving nature.

(vi) There is no one reason for the huge success of the novel 'The Name of the Rose'. Umberto Eco himself calls its success a mystery. It is possible that this detective story that delved into metaphysics, theology and medieval history, interested the readers because the time in which it was written was most appropriate, neither a decade earlier nor a decade later.

11. Answer any two of the following questions in 40-50 words each:

- (i) When the writer first saw Antarctica he was amazed by its vastness and immense white landscape. It was an endless blue horizon and the fact that it was isolated from the rest of the world created an added sense of wonder and mystery about the continent.
- (ii) It was the prediction made by the State astrologer at the time of his birth that led the Maharaja to hunt for a tiger. The Maharaja knew the old saying that killing even a cow in self-defence was no sin. So, in order to save his own life and prove the astrologer's prediction wrong, he started shooting the tigers he found in the forests of his state.
- (iii) The writer's first emotion on reaching Antarctica was that of relief. He felt relieved to have set foot on the Antarctic continent after over 100 hours. Then he experienced a sense of amazement on seeing its vastness and immense white landscape which dazzled his eyes.

12. A physical disability brings about a sense of alienation in the mind of a person more than it causes pain or inconvenience. The play 'On The Face Of It' focuses our attention on the physical pain and mental anguish of the persons suffering from some physical impairment. The playwright, Susan Hill, presents the two leading characters—an old man and a small boy—having different sorts of physical disabilities.

The old man, Mr. Lamb, has a tin leg. It does hurt him when it comes off. Then he gets used to it. He feels pain now and then, in wet weather. He finds it inconvenient to run, to climb a tree or a ladder. He lives all alone in a big house with a garden.

The boy, Derry, has one side of his face badly burnt by acid. He feels physical pain. After discharge from the hospital, he feels hurt at the attitude of the people. They regard his face as horrible and ugly, show signs of being scared and avoid his presence. In short, he is disliked, if not hated. He is not accepted as an ordinary member of society. So, he does not like people to look at him.

It is clear that the sense of alienation that these disabled persons feel causes them constant pain. Such persons expect kind and considerate behaviour from others. They do not want tears, sympathy or pity. They dislike being pointed at, nicknamed, mocked at or made fun of. They only demand reasonable behaviour from others, full of appreciation of their difficulties.

With the injured American's health gradually improving, Dr. Sadao and Hana were in a fix as to what should be done with him. Their loyal servants had left them and keeping him in their house could pose a threat to their lives. As Hana's impatience and distress grew, Dr. Sadao revealed the matter to the General who decided to send assassins to kill the young American in his sleep. Keen on getting rid of the escaped

war prisoner, Dr. Sadao agreed. However, the matter could not be resolved because the assassins never came.

Dr. Sadao then planned another way to get rid of him which was overpowered with sympathy and distant gratitude towards the people he had been linked to in America. He decided to save his patient one more time. He secretly sent him to an isolated island with food, bottled water, clothes, a blanket, and his own flashlight on a boat from where he boarded a Korean ship to freedom and safety.

13. Douglas' experience at the YMCA pool had a far reaching effect on him. It left him weak and terrified. It haunted him till later in life. It ruined his fishing trips and deprived him of the joy of canoeing, boating, and swimming. He was never able to go back into water again. He tried to avoid it whenever he could, but whenever he went to a pool, the terror that seized him in the pool would come back. His legs would become paralysed. Icy horror would grab his heart. This handicap stayed with Douglas for years.

Finally, one October, he decided to employ an instructor and learn to swim. The instructor gradually built a swimmer out of Douglas by making him practice five days a week, an hour each day. He taught him the techniques with the help of a cable and also taught him to breath underwater. To remove his residual doubts about his fear of water, Douglas went up the Conrad Creek Trail to Meade Glacier and swam across to the other shore and back. He then shouted with joy after finally having conquered his fear.

These lines convey Aunt's complete submission to the oppressive authority of her husband. The fear of her husband has gone so deep into her being that even death cannot liberate her from the chains of her mental suppression. Memories of her husband's tortures and atrocities which led her into a humiliating slavery continues to haunt her even after her death.
