Section A - Reading Skills

1. Read the passage given below:

[10]

1. Hiking is a great source of pleasure to us besides being beneficial for health. Once we leave the crowded streets of a city and go out for a walking tour away from the mad world, we really feel free. The open air has a bracing effect on the mind. The congestion of the city, the uproar and tumult, the intolerable noise of traffic, the hectic daily routine, all these are forgotten and the mind is at ease. We then feel like running, leaping, singing and laughing. We travel merrily mile after mile in the company of friends and associates.
2. Hiking takes us in the midst of nature. The sight of waterfalls, flowers, streams, trees and bushes is pleasing. A connect is established between us and nature. Various sounds of nature, like the murmur of a brook or the song of a bird, acquire a new meaning and significance to us.
3. You enjoy the beauty of nature. Minute observations like a snake casting its slough, a mouse peeping out of its hole, a squirrel leaping about on the branches of a tree, a bird flying past us, all these are noticed and they arouse our interest. We have no business worries, no fear of the examination, no anxiety about the home. We have leisure to stand, to walk and talk. It is more thrilling and pleasurable to hike in a mountainous region than in the plains. The excitement of climbing up to the top of a hill, the adventure of coming down a

slope, the grandeur of sunset behind a mountain - All these sights lend a rare charm and interest to our journey.

4. We walk along a zigzag motor road or cut across a mountain path in search of adventure. We may have bright sunny weather or might get caught in a shower of rain. We may look below us into the yawning chasm or up at the mountain peak. The feeling of unlimited freedom makes our hearts leap with joy.
5. Hiking is one of the healthiest sports. It ensures a complete escape from the urgent and busy activities of life and therefore gives solace to our brain. It regains its lost energy and is able to do twice as much work as before.
6. The fresh air, beautiful mountains, majestic trees, chirping sound of birds make one's mind and soul at peace with nature.

2. Read the extract given below:

[10]

1. Necessity is indeed the mother of invention. When areas in and around Leh began to experience water shortages, life didn't grind to a halt. Why? Because a retired civil engineer in the Jammu and Kashmir Government came up with the idea of artificial glaciers.
2. Ladakh, a cold desert at an altitude of 3,000-3,500 meters above sea level, has a low average annual rainfall rate of 50 mm . Glaciers have always been the only source of water. Agriculture is completely dependent on glacier melt, unlike the rest of river/monsoon-fed India. But over the years, with increasing effects of climate change, rainfall and snowfall patterns have been changing, resulting in severe shortage and drought situations. Given the extreme winter conditions, the window for farming is usually limited to one harvest season.
3. It is located between the natural glacier above and the village below. The one closer to the village and lowest in altitude melts first, providing water during April-May, the crucial sowing season. Further, layers of ice above melt with the increasing temperature, thus ensuring continuous supply to the fields. Therefore, farmers have been able to manage two crops instead of one. It costs about 1,50,000 and above to create a glacier.
4. Fondly called the glacier man, he has designed over 15 artificial glaciers in and around Leh since 1987. In recognition of his pioneering effort, he was

conferred the Padma Shri by The President of India.

5. There are a few basic steps followed while creating an artificial glacier. River or stream water at high altitude is diverted to a shaded area of the hill, facing north, where the winter sun is blocked by a ridge or a mountain range. At the start of winter i.e., in November, the diverted water is made to flow on sloping hills facing distribution channels. Stone embankments are built at regular intervals which impede the flow of water, making shallow pools which freeze, forming a cascade of ice along the slope. Ice formation continues for 3-4 months resulting in a large accumulation of ice which is referred to as an 'artificial glacier'.

Based on your understanding of the extract, answer the questions below: (10)

- i. Infer one reason for the following, based on information in paragraph 1. (1)
Areas in and around Leh began to experience water shortage but life didn't grind to a halt.

Subject: Poor maintenance of public parks

Sir

Through the columns of your esteemed newspaper, I would like to draw the attention of the concerned authorities towards the poor maintenance of the public parks.

It saddens me to say that parks. Serve so many purposes in a community. It provides playing space to children, socializing space to adults and a healthy environment to people, are in a pathetic state these days. The gardeners are not regular and the plants are not pruned regularly as a result, the park gives an ugly look. Heaps of garbage can be seen everywhere, also the boundaries are broken. Also, the park has become the favorite halting place of stray cattle and dogs.

There is cow dung all around, making the place a breeding ground for insects and they, in turn, welcome diseases.

The same public park once used to be the pride of our society and a common place for community interaction. Children too are forced to play on the streets due to their unkempt condition.

Therefore, I would like to request the concerned authorities to improve the condition of the park for the convenience of the local residents.

I request you to give some space to my voice in your esteemed newspaper.

Thanking you,

Yours truly,

Reshma.

Subject: Plastic Ban

Dear Editor,

I am writing to express my wholehearted support for the government's ban on single-use plastic. Plastic pollution has become a major environmental concern, harming our wildlife

and ecosystems. This decisive step is a welcome move towards a cleaner and healthier future.

Single-use plastics are a menace. They clog landfills, pollute our water bodies, and endanger animals. Implementing this ban sincerely at all levels, from manufacturers to consumers, can create a significant positive impact. We, as responsible citizens, must also do our part by carrying reusable bags and refusing unnecessary plastic items.

I believe this ban, coupled with public awareness campaigns, can be a turning point. Together, let's embrace a more sustainable lifestyle and protect our environment for generations to come.

Sincerely,

Ram/Rani

5. The pie chart illustrates the distribution of various odd jobs among out-of-school children in India. The largest segment, 46%, is involved in bottle collection, likely due to its low skill requirement and the availability of recyclable materials. Shoes polishing (20%) and car washing (12%) are also significant, possibly because these jobs can be performed on the streets, offering a higher chance to earn money from passersby. Cleaning, dishwashing, and selling and wood collection each account for 7%, indicating these tasks are accessible but less prevalent. Begging constitutes the smallest percentage at 1%, suggesting it is often a last resort due to its low-income potential.

The primary reasons for child labour include poverty, lack of access to education, and family indebtedness. These factors force children into work at a young age, depriving them of education and perpetuating intergenerational poverty cycles. Addressing these root causes is essential to combat child labour and ensure children can pursue education and better opportunities.

The given line graph shows the consumption of three types of nuts i.e. walnuts, almonds and pinenuts over a period of three years 2017 to 2019. The data shows the number of people in hundreds.

In the beginning of 2017 all the nuts were under 100 but almonds were the most preferred one at slightly below 100 and pinenuts were the least favourite at even less than 50.

The year 2018 shows great hikes in interested people in all three nuts with almonds reaching its highest of all three years, going a little more than 200. Walnuts began at around 50 in 2018 but reached its highest of 200 by the end of 2018. Almonds showed a gradual growth from 2017 and towards 2018 end. Pinenuts also seem to be showing increase in interest and goes a little higher than 100 by the end of 2018.

2018 stands as the best year for the consumption or sales of all three nuts but as 2019 approached it faced a decline in sales of all three nuts. Almonds had a sudden fall and reached 150 and remained static at it throughout the year. Walnuts although started on a low note, showed a hike and touched 200 but came down a bit towards the year end of 2019. Year 2019 proved to be the best for pinenuts consumption as it reached its highest of 100 in this year.

To conclude the given data we can say that 2018 was the best year for all three nuts in terms of consumption but there was a sudden slump in the year 2019 and 2019 also faced static interest levels.

- (v) Our desires and hatred would be enough to destroy the world. According to the poet, 'fire' represents 'desire and lust for the possessions' and 'ice' represents 'dislike and hatred which grows silently within us'. Desires, just like fire, spread rapidly and engulf one's whole life. Similarly, 'hatred' fills life with a poison which slowly and gradually leads him to the destruction.

Brother 2: No, you won't. We birds learn flying only after jumping. See, how well I'm flying.

Young seagull: Are you sure, I won't fall into the sea?

Young seagull: OK! I trust you. (The young seagull jumped off the ledge. He fell for hundred metres. Soon he began flying.)

Sister: See! didn't I tell you; you would fly?

Saturday 10:00 pm

My heart is filled with sadness as I think of the oppressed who had to tolerate the inhuman attitude of the oppressors in their own land. The oppression that the communities faced in South Africa under the apartheid regime reminds me the struggles and hardships of millions of Indians who fought against the oppressive British rule. The white regime in South Africa was based on racial discrimination. It symbolised exploitation and extraordinary human disaster. The blacks were deprived of their rights equality and human dignity. In the same way, the Indians were exploited by the British. They worked in the lands like animals who were only supposed to obey. Their lands, resources and approaches were captured by the British. The struggle of Indian under British rule resembles with the struggles of the people of South Africa under the apartheid regime. The struggle created a deep and lasting wound on them. But they never gave up their cause, ultimately, their sacrifices led to their victory- common victory of humanity for peace, for justice and for human dignity.
