

Hellfire MVC rules, regulations and advisories

H.S.E. Supplement 1

Procedures and Norms for the Entrance and Exit to event venues.

Entrance

The designated entrance/gate to venues will be communicated to entrants/members.

The Club will assign sufficient gate marshals to both monitor and safely control members/entrants cars during the entry process.

The duly assigned marshals will be clearly identifiable by wearing hi-viz vests and club insignia.

The members/entrants are required to take notice of and obey instructions from the marshals however, this does not remove the responsibility of the member/entrant for the safety of themselves, their passengers or vehicle.

The marshals will monitor incoming traffic flow and the traffic flow of any public road being used to approach the venue/event. They will issue any relevant instructions to the member/entrant either by hand signalling or verbally. Once within the venue further instructions may be given for the parking of said vehicles.

Exit.

The exit of a venue or event will be the reverse of the above, however the exit may be potentially more hazardous and therefore it is stressed that members and entrants pay particular and close attention to the marshals instructions.

It is expected and required that members and entrants follow instructions which will contribute to a safe and enjoyable event.

Disclaimer:

The instructions/advice given does not in any way absolve any driver of any legal responsibility and obligations.
