Contingency Plan Statement	January 1 st , 2023 – Dec 31 st , 2023
Dates Covered:	
Authorized Company Representative:	Brad Blankenship, Technical Manager, Sigma Stretch Film

Sigma Stretch Film utilizes a stocking program of minimum and maximum levels on the most popular stock items on a national, regional, and local level. Sigma Stretch operates nationally but our strength is having 5 strategically placed locations throughout North America. Volume surges are managed by ensuring that stock is constantly replenished. In addition, management holds meetings to discuss manufacturing issues that could affect availability. We have the ability to ship from any of our 5 locations, and truckload volumes of intercompany transfers are generated when necessary to ensure sufficient volume nationwide. Additionally, Sigma sources its resin from distinct geographical locations to ensure temporary disruptions in the supply chain due to natural or otherwise events do not affect its ability to service its client base.
