

## **Pandemic Flu/Covid 19 Policy**

Little Hens Childcare recognises the importance of advanced planning in order to maintain services and limit the spread of pandemic flu within our Nursery.

Flu is a viral infection, spread from person to person by close contact.

Symptoms may include: Sudden fever Limb and joint pain Sudden cough Diarrhoea or stomach upset Headache Sore throat Tiredness Runny nose Chills Sneezing Aching muscles Loss of appetite

Any child who becomes ill with symptoms which could be pandemic flu while at the Nursery will be isolated from the other children until the child can be collected by his or her parents.

The Nursery will remain open but parents and staff will be informed, especially those in high-risk groups.

Any children or staff who are experiencing symptoms of pandemic flu should stay away from the Nursery until all symptoms have passed and they feel well.

### **Infection control**

The flu virus is spread by:

- Infected people passing the virus to others through large droplets when coughing, sneezing, or even talking within a close distance (one metre or less).
- Direct contact with an infected person: for example, if you shake or hold their hand, and then touch your own mouth, eyes or nose without first washing your hands.
- Touching objects (eg door handles, light switches) that have previously been touched by an infected person, then touching your own mouth, eyes or nose without first washing your hands.

The virus can survive longer on hard surfaces than on soft or absorbent surfaces.

We will limit the risk of catching or spreading the flu virus at the Setting by:

- Regular hand-washing
- Minimising contact between our hands and mouth/nose
- Covering nose and mouth when coughing or sneezing; using a tissue when possible, and disposing of the tissue promptly and carefully (bag it and bin it)

- Encouraging the children at the Nursery to follow the guidance above
- Instructing staff to remain at home if they display any relevant symptoms, or sending them home if they first display symptoms while at work.

At Little Hens Chilcare we will promote infection control through the methods above, and in addition we will:

- Ensure that adequate supplies of cleaning materials are available within the Setting
- Dispose of waste promptly and hygienically
- Clean hard surfaces (eg door handles) with sanitizer regularly
- Provide tissues and suitable facilities for their disposal.
- Each school is cleaned daily by the school cleaner.

Closure We will at all times keep up to date with Government guidelines and follow these as and when necessary. There may be some occasions when we will have to consider temporarily closing the Nursery because we have too few unaffected staff to run sessions safely. The Nursery will also have to close if advised to do so by the local authority in the interest of safeguarding the children in our care. In the event of closure, the Directors and the Manager will notify parents or carers as soon as possible.

The Directors and the Manager will also inform the local childcare information service as well as other relevant parties.

The Directors and the Manager will also notify Ofsted of the closure.

Advance(planning In preparation for dealing with a pandemic disease, the Nursery will ensure that all contact details for staff, children and parents are up to date. We will prepare letters of notification for parents and staff, so that they can be distributed as soon as an outbreak occurs.

We will endeavour to build a bank of relief or supply staff who are able to provide cover should staffing levels fall below the required legal minimums. Any relief staff will be DBS checked at the time of joining our team, so that they are legally able to work with children should the situation arise.

The Nursery will regularly update its information regarding pandemic diseases, by checking the latest guidance from DfE and the local authority, and will inform parents and staff of any changes to our emergency plans.
