

Riverstone Construction

CAPABILITY STATEMENT

Riverstone Construction, LLC is an FDOT DBE and SBE-certified firm specializing in administrative management and consulting services for construction and infrastructure projects. We are committed to supporting the success of public and private sector clients through **high-quality, efficient, and sustainable project delivery solutions.**

Our mission is to ensure **seamless project execution** and **timely completion**, enabling our clients to confidently advance to the next phase of construction.

Our reputation is built on **quality workmanship, safety, and consistent on-time delivery**—earning the trust and repeat business of clients across public and private sector.

CORE COMPETENCIES

In addition to providing comprehensive administrative management and consulting services, Riverstone Construction also **facilitates the following construction services:**

SITE PREPARATION & LAND CLEARING

Grading, excavation, and site readiness for new construction.

DEMOLITION SERVICES

Safe and efficient removal of existing structures and materials.

EARTHWORK & GRADING

Bulk excavation, backfill, and soil stabilization to support foundational integrity.

UNDERGROUND UTILITIES

Installation of stormwater, sewer, and water systems in compliance with regulatory standards.

FOUNDATION CONCRETE

Structural foundations, slabs, and flatwork built to code with precision and durability.

STEEL BUILDING CONSTRUCTION

Pre-engineered steel structures and metal building systems for industrial and commercial use.

PROJECT MANAGEMENT & SCHEDULING

Strategic coordination of labor, materials, and timelines to ensure on-time, on-budget project delivery.

PAST PERFORMANCES

- **World Commerce Industry**
Earthwork and underground utilities.
- **Chaffe Trail Middle School**
Earthwork and underground utilities.
- **Bank of America**
Earthwork and underground utilities.

DIFFERENTIATORS

• **Technology-Driven Efficiency**

In-house LiDAR survey capabilities, Building Information Modeling (BIM), GPS integration, and advanced estimating tools (e.g., AGTEK, Trimble TBC, and B2W) enhance accuracy, streamline planning, and reduce costs.

• **Scan-to-Build Expertise**

Our integrated, in-house “Scan-to-Build” workflow minimizes reliance on subcontractors, helping us manage cost volatility and deliver faster, more reliable results.

• **Resilience in Market Uncertainty**

Riverstone Construction is strategically positioned to navigate fluctuations in both residential and federal markets, ensuring continuity and stability for our clients.

- ### • **Skilled, Adaptive Workforce:**
- Ongoing investment in workforce training keeps our team at the forefront of industry standards, safety practices, and evolving technologies.
