ENVIRONMENTAL SERVICES

Environmental services will support and be integrated with all Industrial Services using a team approach. Both services can operate seamlessly during all phases of project involvement. Utilization of our Environmental Services are client dependent.

Environmental Services include:

- Assessment Services and Compliance Services:

- ✓ Drilling Services for Soil and Water Sampling
- ✓ Sampling (Soil and Water)
- ✓ Technical Reporting (Assessments, CAP A/B's, Phase I, II and III's)
- ✓ Environmental Monitoring and Regulatory Compliance Reporting

- Remedial Action Efforts Services:

- ✓ Soils and Source Removal/Excavation Efforts
- ✓ Tank Closure Assessments
- ✓ Chemical Injection Services (Chemox and ISCO)
- ✓ Remedial System Installation and Construction Services
- ✓ Pilot Testing and Remedial Systems Optimization

In addition, our environmental group specializes in all aspects of RCRA, CERCLA, LUST, and both hazardous and non-hazardous waste mitigation services. All efforts will be conducted to support cleanup of our assigned sites.

Assessment and investigatory services are streamlined to address total definition of plume areas and address successful remedial efforts based upon detailed geologic characterization of each site. This saves time and money and assures compliance with regulatory standards and approvals.

ENVIRONMENTAL COMPLIANCE SERVICES

- Preparation of SPCC and SWPPP Plans and Reporting
- NPDES Permitting, Monitoring and Regulatory Reporting
- EPA and State Required Site Closure Reporting and Documentation Services
- Video Surveillance of Lines, Sewers and Chases (Licensed Inspector)
- Environmental / Stormwater/ RCRA Audits
