WEB PLATFORM 123
CREATIVE ENDEAVORS. THE BRAND 1995

Web 2.0 The “Social Web”

- Web 2.0, also known as the “social web,” emerged in the mid2000’s and was characterized by the rise of social media, user-generated content and interactive web applications.
- Web 2.0 allowed users to interact with each other and create and share content, which transformed the web from a new communication channel to a two-way communication platform.

Web 3.0 The “Semantic Web”

- Web 3.0, also known as the “semantic web,” is the current and emerging generation of the web, which is focused on machine-readable data and the use of artificial intelligence (AI) to make the web more intelligent and intuitive.
- Web 3.0 aims to create a more personalized web experience by enabling machines to understand and interpret user data, preferences, and behaviors.
- Web 3.0 also emphasizes the use of decentralized technologies, such as blockchain to create a more secure and transparent web.
