

Jeremy A. MacMahon, Ph.D

Scientist

Professional Profile

Fields of Expertise

Neurotoxicology, Pesticide Toxicology, Exposure Modeling, Database Management, Biochemistry, Molecular Biology, Science Communication

Education/Certifications

Ph.D., University of California: Davis, 2024, Pharmacology and Toxicology.
Dissertation: *Evaluating soluble epoxide hydrolase as a neuroprotective therapeutic target for mitigating adverse neurological sequelae associated with acute diisopropylfluorophosphate intoxication.*

B.S., University of California: Davis, 2019, Biochemistry and Molecular Biology.
Honors Thesis: *Maternal immune activation causes aberrant behaviors in offspring that are sex-specific and dictated by the baseline immune response before pregnancy.*

Current and Previous Positions

Staff Scientist, Intertox, Inc., Seattle, WA (2024-present).

Graduate Student Researcher, University of California: Davis, Davis, CA (2019-2024).

Selected Project Experience

Scientist experienced in conducting toxicological and human health risk assessments for exposure to chemical and biological agents in air, water, textiles and soil. Chemicals evaluated include metals and other inorganic substances, polychlorinated biphenyls, alcohol, pesticides, solvents, and organophosphates. Biological agents include molds and bacteria.

- Conducted physiologically-based pharmacokinetic modeling of ethanol metabolism and intoxication in support of litigation.
- Conducted toxicological assessments of human exposure to chemicals present in or off-gassed from airline uniform garments in the context of numerous workers' compensation claims. Routes of exposure assessed were dermal and inhalation.
- Developed large scale database management system and data visualization software.

- Conducted a toxicological assessment of human exposure to mold due to environmental exposure in the context of a workers' compensation claim.

Professional Memberships

- Society of Toxicology (2021-present)
- American Epilepsy Society (2022-present)

Selected Presentations

2024. **MacMahon J.A.**, Andrew P., Bernardino P., Lein P.J. Evaluating soluble epoxide hydrolase as a neuroprotective therapeutic target for mitigating adverse neurological sequelae associated with acute diisopropylfluorophosphate intoxication. Annual Society of Toxicology Meeting in Salt Lake City, Utah, USA. March 2024.

2023. Bernardino P., **MacMahon J.A.**, Andrew P., Lein P.J. Blood-brain barrier impairment is seizure-dependent in a male rat model of acute organophosphate intoxication. Poster presented at the 16th Annual CounterACT Network Research Symposium in Bethesda, Maryland, USA. August 2023.

2023. Andrew P., **MacMahon J.A.**, Bernardino P., Lein P.J. Functional phenotyping of microglia and astrocytes in rats acutely intoxicated with diisopropyl-fluorophosphate (DFP). 16th Annual CounterACT Network Research Symposium in Bethesda, Maryland, USA. August 2023.

2023. **MacMahon J.A.**, Blackmon T., Bruun D., Bernardino P., Hogans R., Harvey D., Saito N., Gorin F.A., Lein P.J. Acute exposure to diisopropylfluorophosphate (DFP) perturbs the plasminogen activation system (PAS) within the plasma and brain of male rats. Annual Society of Toxicology Meeting in Nashville, Tennessee, USA. March 2023.

2023. **MacMahon J.A.** Evaluating soluble epoxide hydrolase as a neuroprotective therapeutic target for mitigating adverse neurological sequelae associated with acute diisopropylfluorophosphate intoxication. Benzodiazepines: Seizures and Improving Long-term Outcomes – NIH CounterACT program Workshop, University of California, Davis, Davis, CA (online meeting only). February 2023.

2022. **MacMahon J.A.**, Andrew P., Bruun D.A., Bernardino P., Hammock B.D., Lein P.J. Soluble epoxide hydrolase as a therapeutic target for mitigating organophosphate-induced neuroinflammation and acquired epilepsy in a rat model of acute diisopropylfluorophosphate (DFP) intoxication. American Epilepsy Society in Nashville, Tennessee, USA. December 2022.

2022. **MacMahon J.A.** Soluble epoxide hydrolase as a therapeutic target for mitigating organophosphate-induced neuroinflammation and acquired epilepsy in a rat model of acute diisopropylfluorophosphate (DFP) intoxication. Toxicology mentoring and skills development training program workshop, University of California, Davis, Davis, CA. October 2022.

2022. **MacMahon J.A.** Investigating soluble epoxide hydrolase as a therapeutic target for mitigating the chronic neurotoxicity of acute diisopropylfluorophosphate (DFP)

intoxication. 15th annual CounterACT Research Symposium, Higgins Hotel, New Orleans, LA. March 2022.

2022. Bernardino P., Hobson B., Baker S., Andrew P., **MacMahon J.A.**, Bruun D., Chaudhari A., Lein P.J. Magnetic resonance imaging (MRI)-evidence of blood-brain barrier (BBB) disruption in a rat model of organophosphate intoxication. 15th Annual CounterACT Research Symposium in New Orleans, Louisiana, USA. March 2022.

2022. Liu X., Calsbeek J.J., Gonzalez E., Nguyen A., **MacMahon J.A.**, Andrew P., Lein P.J. Role of cholinergic nicotinic receptor in status epilepticus caused by acute diisopropylfluorophosphate (DFP) intoxication in adult mice. Annual Society of Toxicology Meeting in San Diego, California, USA. March 2022.

2019. **MacMahon J.A.**, Prendergast K., Estes M., Farrelly K., Cameron S., Aboubechara J.P., Horta A., Kincheloe G., Haapanen L., Van Der List D., Bauman M.D., Carter C., Van De Water J., McAllister A.K. Behavioral phenotypes in maternal immune activation are influenced by baseline immune response and sex. Annual Undergraduate Research Conference, Davis, California, USA. April 2019.
