

# STANDARD-DD DAMPER DRIVES, L.L.C.

## PROCESS INSTRUMENTATION START-UP AND COMMISSIONING SERVICES

**STANDARD-DD** offers full engineering support and design assistance for all of our products. Our service is available to the customers initial phase and continues through production, installation and ongoing technical support. Our experienced staff can assist your company project and system needs.

**BEFORE**  
5" BORE X 12" STROKE  
LINEAR AIR CYLINDERS

**AFTER**  
ROTARY VANE  
PNEUMATIC ACTUATORS

**STANDARD-DD's** first goal is listening to and understanding the customers needs and offering solutions to their applications.

**STANDARD-DD** will comply with our customers specifications for any brand of valve, pneumatic or electric actuators and control accessories.

Whatever the time, location or complexity of a project, **STANDARD-DD** has the field service know how and equipment to do the job safely, effectively and on schedule.

# STANDARD-DD FIELD SERVICE AND INSTALLATION

**STANDARD-DD** Damper Drives Company provides expert Field Installation services of the products we sell. Our services include complete turn-around of removing old outdated damper drives and valve automation at the customers facility.

In addition, we provide around-the-clock field serve in support of our customers and their emergency requirements.

Our service personnel can also train your personnel on-site to assure our damper drives, valves, actuators and control accessories always operate at peak performance.

**STANDARD-DD** service personnel work quickly and efficiently, minimizing downtime and plant shut-downs.

We service many industries, such as Electric Power Utilities, Oil & Gas Refineries, Chemical/Petrochemical, Steel, Aluminum and other metals, Pulp & Paper Mills, Pharmaceuticals, Food & Beverage, Water & Wastewater Treatment, Co-Generation, Fluidized Bed Boilers, Glass Manufacturing, Cement & Lime, Marine vessels and O.E.M. accounts.

We provide complete Valve Automation as well as replace actuators, valves and control accessories, such as positioners, operating on 4-20 mA dc analog, Fieldbus, Profibus control, solenoid valves, limit switches, lock-up valves, speed control valves, air fail-safe reservoirs, manual gear override, lock-up valves to hold actuator in last position on loss of control signal and/or air supply pressure.

We can replace any Type or brand of actuator, such as Pneumatic, Electric, Hydraulic, Electro-Hydraulic, Diaphragm actuators and Linear Air or Hydraulic Cylinders.

**STANDARD-DD** and Field Service Personnel are General Liability Certified and insured, Confined Service Certified, Drug Tested and back ground screened.
