CERTIFIED **WEATHER RESISTANT** **UV RESISTANT** **DRY TIME** **MARKING RANGE** **LOW-CORROSION** **PERMANENCE**

LA-CO Industries creates specialized products that are right for the application. From general marking tools to markers made especially for the unique needs of your job, and from temperature indicators to industrial coatings and chemicals, you'll find the products that will always perform to your professional standards.

MARKAL®

No other marker manufacturer has the quality, the precision, and the range of products for professionals and general industry as Markal. Made in the USA, and manufactured to deliver outstanding results, Markal is the industry's marking standard.

TEMPIL®

From Tempilstik® to Bloxide®, Tempil is known worldwide as the performance leader in temperature indicating, monitoring, and coatings. Professionals depend on Tempil's precision and technical capabilities, making each Tempil product exactly right for the application.

LA-CO®

Providing quality products for the plumbing, pipefitting, HVAC, and maintenance operations professional, LA-CO is a global leader in chemicals for a wide range of applications and solutions.

TABLE OF CONTENTS
LIQUID PAINT MARKERS

For over 90 years, Markal® has been the trusted leader in industrial marking solutions because of our commitment to developing new and innovative products for use in some of the world's toughest environments. Ideal for use in the automotive industry, construction, welding, and metal production and fabrication, liquid paint markers are one of the most versatile and relied upon industrial marking tools across the world. These permanent and temporary liquid paint markers offer real paint in multiple tip sizes and colors, including a range of certified colors for nuclear and other corrosion-resistant applications.

MARKAL®

PAINT-RITER®

Paint-Riter® Valve Action

For general marking

- Fast-drying, permanent paint for immediate handling reduces work downtime
- Dura-Nib medium bullet tip resists wear to provide long marking life
- Durable metal barrel and clip-cap reduce breakage and store easily in pocket

| 3mm | 30s | -50°F TO 150°F | | | |

Paint-Riter® Water Based

Bold marking where VOC issues are a concern

- Fast-drying, permanent paint for immediate handling reduces work downtime
- Low odor makes it great for indoor use and climate controlled facilities
- Low VOC provides a safer marking tool
- Nine vibrant colors with excellent opacity

| 3mm | 90s | 40 TO 150°F | | | | |

Paint-Riter® Window Marker

Create bright marks that are easily removed

- Removable on any non-porous surface: Writes on glass, steel, aluminum, plastic and rubber
- Dries quickly to avoid smudging or running
- Easy removal with water and a cloth (or run the car through car wash)
- Fabric nib won't scratch delicate surfaces

| 3mm | 25s | -50°F TO 150°F | |

MARKAL®

Paint-Riter® Fine

For precision marking

- Fine tip size for precise, permanent paint marking
- High-strength, lightweight barrel designed for industrial use
- Self-storing cap with clip protects tip for longer life and stores easily in pocket

| 1.5mm | 30s | 0°F TO 150°F | | | |

96873	Black	96876	Green		

Paint-Riter® Jumbo

Extra-large liquid paint marker

- Largest marks available (up to 14mm) in an industrial paint marker
- Extra-large tip ideal for signage or safety marking where immediate identification is required
- Valve-actuated tip releases paint on-demand for smooth continuous use

| 14mm | 60s | 0°F TO 150°F | | | |

Case Quantity: 24

*Indicates that this marker color is low in chlorides, halogens, and sulfurs for low corrosion marking requirements.

BALL PAINT MARKERS

A steel ball tip makes these markers preferred when bright and precise marking is needed on rough, wet or oily surfaces.

Paint-Riter® Metal Ball Tip

Metal roller ball marker

- Durable metal-ball tip resists wear and clogging for long-marking life on rough surfaces
- Non-drip paint formula allows for easy jobsite marking
- Industrial paint withstands harsh environments and weather conditions
- Sturdy plastic bottle with 3mm steel ball tip
- Plastic cap keeps tip clean between jobs

PAINT-RITER+

Paint-Riter®+ Ultra Violet

Visible in UV light

- Makes clear, invisible marks that illuminate bright blue when viewed with an ultraviolet or black light
- Invisible paint formula is ideal for security, theft-prevention, and quality control
- Fast-drying formula reduces smearing

| 3mm | 30s | -50°F TO 150°F | | |

Paint-Riter®+ Certified

Nuclear and military pre-certified

- Ideal for use on stainless steel or superalloys in industries that require prevention against corrosion, pitting, or degradation
- Certified to meet the following U.S.A. and international specifications:
  - EDF PMUC
  - MIL - STD-2041D
  - U.S. DOE RDT F-7-3T (expired)
  - U.S. Navy C3070

MARKAL®

Paint-Riter®+ Low Corrosion Fine

Low-corrosion solid paint marker

- Ideal for use on stainless steel or super alloys in industries that require prevention against corrosion
- Fast-drying formula leaves wear, weather, and UV-resistant marks
- Xylene-free paint reduces user health risks

| 1 mm | 30s | -50°F TO 150°F | | | | |

Paint-Riter®+ Galvanizer

Removable paint marker for galvanizing

- Makes durable marks on steel during fabrication. Marks are removed completely during the pickling process.
- More marks per marker - more than 2x longer write-out vs leading competitor
- Fast-drying and xylene-free
- Weather resistant paint formula
- Durable acrylic nib marks on smooth, rough and rusty surfaces

| 3mm | 30s | -50°F TO 150°F | | | |

INK MARKERS

Preferred for their ability to immediately mark and dry on almost any type of surface, felt-tip ink markers can be found on almost any job site, in any factory, or throughout warehouses and shipping departments around the world. Our DURA-INK® family of ink markers offers the best combination of performance, durability and value.

MARKAL®

DURA-INK®

DURA-INK® Needle Nose

Permanent ink marker with extended micro tip

- Extended nose is ideal for marking through holes and hard-to-reach areas
- Micro tip for precision marking on small surfaces
- Industrial-strength ink is smear and water-resistant for longer lasting marks

1mm	3s

Case Quantity: 24

Surfaces:

MARKAL®

DURA-INK® Dual-Tip

Dual-sided marker provides the convenience of two markers in one

- Versatile dual tip design is excellent for broad writing on large spaces and ultra-fine precision marking on small surfaces
- Industrial-strength permanent ink dries quickly and is wear and weather-resistant for longer lasting marks
- Built-in clip-caps snap into each other, preventing lost caps and marker from rolling off work surfaces

96302	■ Blue		

DURA-INK®+ Easy Off Water & Detergent

Removable temporary ink is easily removed with water or detergent

- Perfect for temporarily marking bare (non-treated, non-painted) metal. Marks that are removed leave no ghosting.
- Will not ghost or bleed through when painted over
- Valve-actuated nibs provide continuous marking for better controlled flow
- Durable metal barrel prevents breakage for longer marking life

Soft nib won't scratch surfaces

SOLID PAINT MARKERS

With the introduction of the original B® Paintstik® in 1934, Markal® changed the face of industrial marking by creating a product that combines the durability of paint with the convenience of a crayon. Since that time, we have continued to build on this innovation by engineering unique marking solutions, making our Paintstiks one of the most diverse and commonly used types of industrial marking tools available.
MARKAL®

PAINTSTIK®

Paintstik® Original B®

Multi-purpose permanent marking

- Real paint for long-lasting, highly-visible marks
- Superior marking on rough, rusty, or dirty surfaces
- Weather and UV-resistant for long-lasting marks

HOT SURFACE MARKERS

The tools required in a smelter or forge and casting foundries must be able to consistently perform and be able to withstand extreme temperatures, and industrial markers are no exception. Our hot surface line of solid paint markers will only begin producing marks when in the stated working temperature, and will provide long-lasting, highly-visible marks that will not run, char, flow, discolor, peel, or crack. With rated temperatures from 120˚F (49˚C) to 2200˚F (1204˚C), these markers are ideal for use on coils, billets, bars, ingots, and plates.

MARKAL®

HEAT STIK®

MARKAL®

TRADES-MARKER®

Versatility of a paper-wrapped grease pencil
with the convenience of push-button advance.

Trades-Marker® All Purpose

Mechanical grease pencil

- Marker refills eliminate mess and paper waste of grease pencils, saving time and money
- Holder maximizes complete use of marker
- Push-button advancing makes for easy, one-handed use

LUMBER & TIMBER MARKERS

Whether marking raw materials in the field or in plant for processing, Markal has a marker engineered for use on almost any wood surface and for use with grade mark readers. For marking logs, boards, or raw lumber, our lumber crayons are an economical and effective way to mark wet, dry, rough, and dirty wood for improved processing and tracking. For use with grade mark readers, our scanning crayons have been engineered with exceptional color and vibrancy to reduce misreads and improve efficiency.

MARKAL®

TIMBERSTIK ®

Timberstik® All Purpose

Economical, wax-based

- Known in construction trades as "keel" or layout chalk
- Formulated for weather and fade resistant marking on most surfaces
- Special softer formula allows for superior marking in cold climates

MARKAL ®

SCANNING CRAYONS

ULTRASCAN®

High-performance crayon for grade mark readers

- Bright colors provide the highest fluorescent response of any lumber grading marker
- Dramatically longer use, provides up to 4X the writing life of competitive crayons
- Maximum character recognition and accuracy for the lowest possible reject rates
- Each batch is tested to meet the specifications for Lucidyne ColorScan® and Newnes-McGehee grade mark readers
- One hardness for all temperatures, eliminates duplicate inventory
- Specifically developed for Lucidyne, Newnes-McGehee and Cypress grade mark readers
- Unique formula provides excellent writing on wet and green lumber, even with fungicide coating
- 26 colors for superior color separation compared to competitive fluorescent wax crayons

WELDING MARKERS

The first step to creating a durable, long-lasting weld is using the best tools available to meet the level of precision required during the process. Markal® offers the best in economical and specialized welding markers to produce longer-lasting and more visible marks guaranteed to not contaminate or cause inclusions, pitting, or porosity in the weld.

MARKAL®

Silver-Streak®

For welding, metal layout and fabrication

- Highly-visible marks illuminate when cutting or welding
- Superior to soapstone in markability and durability; will not rub, burn or blow off surface
- Marks on oily, wet or rusty metals, and will not scratch or abrade surfaces
- Durable, mechanical holder prevents stick breakage and features a convenient, built-in sharpener and pocket clip for easy storage

TEMPERATURE INDICA

Whether used as part of a manufacturing process, welding, metal fabrication, or in quality control to help prevent damage caused by high temperatures, accurate temperature indication is a vital part of almost all industrial environments. For over 90 years, we have been a leading and trusted name in fast, reliable, and accurate temperature indication products for almost any job.

SPECIALTY COATINGS

Tempil's brand of specialty chemicals not only withstand use in some of the world's toughest environments, they can offer added efficiency, protection, and value that other primers and paints can't.

Bloxide®

Bloxide is a versatile, rust-preventive, weldable primer with a unique formula that can be applied to a wide range of metals, preventing the formation of rust and corrosion during extended periods of storage. Bloxide eliminates the need to clean metal surfaces before welding due to its enhanced corrosion preventative features, thus saving time and labor costs during fabrication. Bloxide is a completely weldable primer, also improving the weld quality after application, resulting in X-Ray quality welds.

Weldable Primer
- Ideal for extended periods of outside steel storage
- Ability to strike welding arc without removal
- Can be sprayed, brushed or parts can be dipped into it.

Applications:
- Marine and offshore metal fabrication
- Almost all steels
- Primer for paints and coatings

UP TO 800°F

Pyromark®

Pyromark is a silicone-based coating that is specifically formulated for protecting, decorating or color identifying metal surfaces that will be subjected to high temperatures. Pyromark provides long-lasting protection against oxidation and corrosion, and has excellent coverage characteristics with no blistering, chipping, cracking or peeling at rated temperatures.

High Temperature Paint

- Silicone-based coating for long-lasting protection against oxidation and corrosion
- Improves heat transfer in infrared heating applications due to high emissivity properties
- Solar absorptivity of 0.95 makes it an ideal black box absorber
- Only use Pyromark® Thinner to dilute or replace evaporated solvent

Applications:

- Solar Absorbers
- Infrared Heaters/Boilers/Furnaces
- Ovens/Fireplace Accessories
- Mufflers/boat and auto engines

Proudly made in the USA for over 90 years, workers have trusted LA-CO®
to get the job done. LA-CO® has what quality control and maintenance
workers need. We offer products for all kinds of jobs, from specialty
fluxes for all metals to sealing high-pressure systems with our thread
sealants. When your job is on the line, make sure you have the best
materials for the job.

LA·CO®

LUBRICANTS

Keeping your machinery running smoothly can add years of life to your equipment and can help avoid dangerous failures and costly repairs. LA-CO® industrial strength anti-seize compounds, pipe gasket lubricant, thread cutting oil, and general purpose lubricants help to ensure that you get the most out of your equipment.

LEAK DETECTORS

Specially formulated to work within a broad temperature range and release ultra-sensitive, long-lasting and highly visible fluorescent bubbles for easy leak identification. LA-CO brand leak detectors use non-corrosive, non-toxic formulas that are safe for oxygen or gas line connections and won't damage metal pipes.

MADE IN USA ★

LUBRICANTS

Lubri-Joint®

Water dispersible gasket lubricant

- FBC System Compatible
- Ideal for lubricating rubber gaskets, promoting proper expansion, and ensuring correct fit
- Suitable for all types of pipelines, including PVC and soil pipe, so only one brand of gasket lubricant is needed

NSF Certified to NSF/ANSI 61-G

FBC SYSTEM COMPATIBLE

FLUXES

When it comes to soldering and brazing, LA-CO® is the brand that workers around the world trust to do the job right the first time, every time. Proudly made in the USA for over 90 years, LA-CO makes specialty fluxes for all metals including stainless steel, brass, iron, tin and zinc. When your job is on the line, make sure you have the best materials for the job.

FLUX

Regular Flux Paste

Soldering flux for copper

- Water-soluble paste won't leave residue in water piping
- Meets industry standard ASTM B813 and contains no zinc chloride to reduce corrosion concerns
- Non-acid, non-toxic, and lead-free to eliminate safety concerns

HEAT BARRIERS

Whether soldering, brazing, or welding, heat can cause significant damage to sensitive materials, components, or surrounding areas. These excessive temperatures cannot only damage items in a work area, but can also create both health and safety hazards. Heat barrier products are specially designed to withstand these brutal temperatures when other materials can't to keep your jobsite productive, safe, and free of damage.

Cool Gel®

Cool Gel®

Heat barrier spray

- Protects lead free valves during soldering
- Reduces the threat of costly heat damage to rubber seals and gaskets
- Protects painted and finished surfaces from discoloration due to torch heat
- Safe, non-toxic, harmless to skin, and odorless

MARKAL®

Introducing Markal® Plus Series!

Premium performance items are joining our new
"Plus (+) Series" product line. These highly
engineered tools are designed to perform
in specific applications and environments.

PLUS SERIES
