hydration that works®

It's critical for employers to protect workers from heat-related illnesses and injuries when working in high heat environments. For any occupation that involves working in high heat environments, it's important to be aware of environmental conditions and take steps to prepare for dangerous heat hazards, both outdoor and indoor.

Sqwincher® hydration solutions are specifically designed to help prevent worker dehydration and recover from heat stress related issues. Our wide range of unique packaging options provide a perfect way to stay hydrated throughout the day, and with a variety of delicious, refreshing flavors, hydrating has never been more enjoyable!

But it's not just about taste - our products are formulated with essential electrolytes (sodium and potassium) required to replenish those lost through perspiration and respiration. This helps prevent dehydration and heat stress, which can lead to accidents, injuries, and illnesses. Sqwincher® products are internal PPE designed to protect workers from the inside out. Keep them hydrated, safe and productive with Sqwincher® hydration solutions - the ultimate hydration safety "gear"!

FORMULATION

Use the color key to find your formula.

FORMULATION	PORTFOLIO AVAILABILITY				
	Freezer Pop	Single Serve	Ready to Drink	Powder	Liquid
SQWINCHER ORIGINAL • Hydrating since 1975 • Gluten Free	✓	✓	✓	✓	✓
SQWINCHER ZERO SUGAR FREE, LOW CALORIE • Gluten Free • Excellent Source of Vitamin C (ZERO Powder Products Only*) *2.5 gallon yield ZERO powder and single serve Qwik Stik® ZERO. Nutritional information available at www.sqwincher.com/all-products	✓	✓	✓	✓	✓
EVERLYTE CLEAR FORMULATION • No color or dyes • No preservatives • No artificial sweeteners • Gluten Free		✓			

ELECTROLYTE FREEZER POPS

3 FL OZ SQWINCHER SQWEEZE®

FLAVOR	SKU	CONTROL #
ASSORTED	159060962	9971655

Assorted Pack Flavors Include: Cherry, Orange, Grape, Lemon-Lime and Mixed Berry

- *Hydration made easy-just freeze and serve*
- *Low sodium and gluten free*
- *Formula: Regular*
- *Case: (150) 3oz pops-**Bulk Packed***
- *Cases per pallet: 60*

3 FL OZ SQWINCHER SQWEEZE® ZERO

FLAVOR	SKU	CONTROL #
ASSORTED ZERO	159200231	9981620

ZERO Assorted Pack Flavors Include: Watermelon, Orange, Dragon Fruit, Punch & Mixed Berry

- *Hydration made easy-just freeze and serve*
- *Low sodium and gluten free*
- *Formula: Sugar free*
- *Case: (150) 3oz pops-15 bags of 10*
- *Cases per pallet: 60*

SINGLE SERVE

- *1 stik yields 20oz*
- *Just pour into water, mix gently and enjoy*
- *Convienent, on the go electrolyte replenishment*
- *Low sodium and gluten free*
- *Formula: Sugar Free*
- *Case: (500) .11oz stiks-10 packs of 50*
- *Cases per pallet: 96*

20 FL OZ YIELD QWIK STIK® ZERO

Heat Stress Management

Sqwincher hydration that works®

CHECK YOUR URINE COLOR TO MONITOR YOUR BODY FLUID LEVELS.

- **Severe Dehydration:** Contact a physician to determine the severity of dehydration.
- **Dehydration:** More fluids should be consumed immediately.
- **Hydrated:** You are properly hydrated.
- **Overhydration:** Clear urine is a sign of serious overhydration. Reduce fluid intake.

Source: https://health.clevelandclinic.org/what-urine-color-means

RECOMMENDATION FOR PROPER HYDRATION

Maintaining and balancing the body's fluid level is imperative.
A healthy adult, in a moderate climate, is recommended to drink:

WATER (cups per day for men)[1]

WATER (cups per day for women)[1]

In hotter environments and/or strenuous activity, an increase in fluid intake may be necessary.

[1]Source: Water: Mayo Clinic - http://www.mayoclinic.com/healthy-lifestyle/nutrition-and-healthy-eating/indepth/water/art-20044256

6-10 oz. of electrolytes every 15-20 minutes during strenuous activity, especially in hot environments.[2]

Individual circumstances may vary and include water with electrolyte consumption.

[2]Source: Role of Carbohydrate-Electrolyte Fluid Replacement in the Industrial Environment. Human Performance Laboratory, University of Alabama, Tuscaloosa, AL.

ELECTROLYTES

Na SODIUM · K POTASSIUM · Mg MAGNESIUM · Ca CALCIUM

Water is necessary, but water alone will not replace lost nutrients and minerals such as electrolytes. Electrolytes consist of minerals such as sodium, potassium, magnesium, and calcium, which are critical for cell and muscular function.

THERMOREGULATION

The body's process of thermal control

As outside temperature rises, the body's first method to keep cool is to sweat. The more heat it experiences, the more vasodilation will occur to radiate the excess body heat. It takes energy to perform these functions and the body needs the proper fuel and fluids to achieve thermoregulation to prevent overheating.

Source: https://www.ncbi.nlm.nih.gov/books/NBK507838/

HOW TO USE HEAT INDEX CHART

1. Find today's predicted temperature.
2. Next, find today's predicted humidity.
3. Follow the answers to #1 and #2. Where they intersect will determine APPARENT TEMPERATURE or WHAT IT FEELS LIKE.

EXAMPLE:

1. Forecasted Temp=95°
2. Forecasted Humidity=60%
3. Index (feels like)=114°

Source: https://www.weather.gov/ama/heatindex

HEAT INDEX CHART

Air Temp. → / Relative Humidity ↓	70°	75°	80°	85°	90°	95°	100°	105°	110°
	Apparent Temperature (Degrees Fahrenheit) →								
0%	64°	69°	73°	78°	83°	87°	91°	95°	99°
10%	65°	70°	75°	80°	85°	90°	95°	100°	105°
20%	66°	72°	77°	82°	87°	93°	99°	105°	112°
30%	67°	73°	78°	84°	90°	96°	104°	113°	123°
40%	68°	74°	79°	86°	93°	101°	110°	122°	137°
50%	69°	75°	81°	88°	96°	107°	120°	135°	150°
60%	70°	76°	82°	90°	100°	114°	132°	149°	
70%	70°	77°	85°	93°	106°	124°	144°		
80%	71°	78°	86°	97°	113°	136°	157°		
90%	71°	79°	88°	102°	122°	150°	170°		
100%	72°	80°	91°	108°	133°	166°			

Heat Index Values were devised for shady, light wind conditions. Exposure to full sun can increase values by up to 15°. Strong winds, particularly with hot, dry air can be extremely hazardous.

HEAT INDEX 80° - 90°	HEAT INDEX 90° - 100°	HEAT INDEX 101° - 129°	HEAT INDEX 130° and higher
Acclimate employees and monitor for heat related issues.	Sun stroke, heat cramps and heat exhaustion are possible with prolonged exposure and physical activity.	Sun stroke, heat cramps and heat exhaustion likely. Heat stroke possible with prolonged exposure and physical activity.	Heat stroke or sun stroke **IMMINENT.**

FLUID LOSS FACTORS

Factors that contribute to fluid loss* include:

- Sweating
- Exhaling
- Urination
- Diuretic Intake
- Natural Body Exertion to Maintain Core Temperature

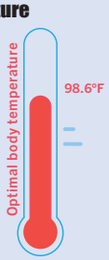

*Varying factors: age, gender, environment and conditioning

Source: https://www.webmd.com/a-to-z-guides/dehydration-adults

HEAT FACTORS

Contributing to elevated body temperature and rapid fluid loss:

- High Temperature & Humidity
- Level of Exertion/Work Load
- PPE & Heavy Clothing
- Poor Air Flow & Circulation
- Machine/Equipment Heat
- Direct Sunlight Exposure
- Medical Precondition
- Lack of Physical Conditioning

Source: https://www.dir.ca.gov/dosh/etools/08-006/whatcauses.htm

FLUID/ELECTROLYTE LOSS WARNINGS

LOSS	RESULT
2%	Impaired Performance
4%	Muscular Function & Capacity Declines
6%	Heat Exhaustion
8%	Hallucination & Disorientation
10%	Circulatory Collapse & Heat Stroke

Sources: https://pmc.ncbi.nlm.nih.gov/articles/PMC4207053/#:~:text=Traditionally%20a%202%25%20or%20more,on%20physical%20and%20cognitive%20performance.&text=Although%20it%20is%20often%20overlooked,water%20balance%20on%20cognitive%20performance

Heat Stress Management

5 DAY ACTUAL TEMPERATURE & HUMIDITY FORECAST

1 TEMP / HUMIDITY	2 TEMP / HUMIDITY	3 TEMP / HUMIDITY	4 TEMP / HUMIDITY	5 TEMP / HUMIDITY

HEAT AWARENESS

1. Environments of 80°F +
Use extreme caution, especially during strenuous activity.

2. Acclimate
Allow the body to adjust to high-heat, high-humidity environments.

3. PPE Clothing
PPE is essential but increases heat stress risk. At 80°F+, limit time in impervious suits to 15 minutes per hour unless using cooling or a heat stress monitor.

4. Thirst and/or Sweat
These are NOT ALWAYS dependable gauges for proper hydration or fluid intake.

5. Know the Symptoms
Be familiar with heat stroke, heat exhaustion and heat cramps to respond quickly. (Review Heat Illnesses below)

6. Prevention
Preventing a heat stress injury is much easier than recovering from the injury. Drink fluids and replace electrolytes on a regular basis throughout the day.

HEAT ILLNESSES

Symptoms and responses to unprotected heat exposure.

SUNBURN Redness & painful skin; swelling of skin, blisters, fever and headaches are typical in severe cases.	Ointments for mild cases. DO NOT break blisters. If they do break, apply dry, sterile dressing. **FOR SEVERE CASES, CONSULT A PHYSICIAN.**
HEAT CRAMPS Painful muscle spasms, usually in the legs and abdomen. Possible heavy sweating.	Apply firm pressure on cramping muscles, then gently massage to relieve muscle spasm. **GIVE SIPS OF SQWINCHER® PRODUCTS EVERY 15 MINUTES.**
HEAT EXHAUSTION Heavy sweating, weakness, pale and clammy skin, nausea, low blood pressure, rapid pulse, fainting, and possible vomiting.	Stop exertion, move to a cool spot and drink Sqwincher® products every 15 minutes for an hour. **IF VICTIM VOMITS, SEEK IMMEDIATE MEDICAL ATTENTION.**
EXERTIONAL HEAT ILLNESS Stuporous appearance, tired, nausea with possible vomiting. Unsteady gait, heavy perspiration, dehydrated with high body temperature (up to 104°F), often accompanied by headache, rapid respiration and pulse.	Cease exertion and promptly cool body exterior. Initiate replacement of fluids – water first, then Sqwincher® products. **IF VICTIM CANNOT RETAIN FLUIDS, TRANSPORT TO HOSPITAL.**
HEAT STROKE High body temperature (105°F or higher), hot, red and dry skin, strong rapid pulse, possible unconsciousness.	Heat stroke is a severe medical problem. Move victim to cooler area and reduce body temp with cold bath or sponging. Use fans and air conditioners. **GET VICTIM TO HOSPITAL – DELAY CAN BE FATAL. DO NOT GIVE FLUIDS!**
