Subject: Huwa-San TR-3 against COVID-19

Dear,

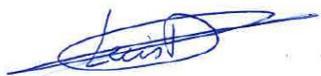

Roam Technology NV hereby wants to declare that Huwa-San is a biocide based on silver stabilized hydrogen peroxide and has a full spectrum of activity bactericidal, fungicidal and virucidal activity.

- Bactericidal activity is tested against EN 1276 and EN 13697;
- Fungicidal activity is tested against EN 1650 and EN 13697;
- Virucidal activity has been proven on enveloped and non-enveloped viruses according to EN 14476;

Based on our experience, we expect that Huwa-San TR-3 and a contact time of 5 minutes should be sufficient against COVID-19 virus.

Specific tests on betacoronaviruses as a surrogate for COVID-19 will be finalized within a few weeks' time.

Kind regards,

Dennis Lecis
Regulatory Affairs & QSHE Manager
