

WE ARE STANDING UP FOR QUALITY CARE TOGETHER

We are the nurses, nurse practitioners, respiratory therapists and laboratory professionals who care for Kaiser members across Hawaii.

We take pride in serving our patients and our community every single day. We chose this work because caring for people matters—and we want to make sure that Kaiser continues to provide the safe, timely and high-quality care that our community deserves.

Right now, we are advocating for a fair contract that supports the recruitment and retention of skilled healthcare workers, ensures safe staffing levels and recognizes the essential care and professional expertise we provide. When healthcare teams are fully supported, patients receive better care. That's what this is all about.

Your voice matters in our fight to protect the care you deserve.

Please take a moment to share your experience as a Kaiser patient. Your feedback will help highlight what is working and what needs to improve.

Scan the QR code below to share your story. It will make a real difference.
