

E-NOSE

SECURITY

graffiti-e-nose™

Graffiti vandalism costs State and Local Governments millions of dollars a year. Market studies have shown that people feel unsafe in areas with graffiti, and fewer people will use public transport or access buildings which are covered in graffiti.

graffiti-e-nose™ is a powerful new deterrent to graffiti vandals. It instantly alerts security that an attack is in progress. It reduces your damage and clean up costs.

graffiti-e-nose™ senses paint fumes the moment they leave the can. Instant SMS alerts sent directly to one or more mobile phones gives security teams maximum response time.

How it works

MONITOR

- Continuous monitor of airborne chemicals
- 50+ metre effective range
- Robust, weather proof, camouflaged casing

REPORT

- Data transmitted instantly to computer
- Permanent record of events retained

ALARM

- Predefine conditions requiring attention
- Automatic alarm system instantly alerts multiple receivers by sms
