**Post Industrial Recycling (PIR)**

Residual products left behind by the industrial production of plastic products are a high-quality and valuable raw material.

**PET Improvement (PET)**

P:REACT is the next dimension of PET recycling. It only takes a few minutes to take PET from industrial waste or post-consumer PET and turn it into food-safe rPET.

**Post Consumer Recycling (PCR)**

Nearly half of the plastic produced in the world gets thrown away after just one use. This waste could serve as a valuable resource if only we took advantage of it.

Our intelligent recycling technology provides the most sustainable solution for every requirement. For a wide variety of raw materials such as industrial waste, post-consumer waste or PET materials, NGR has the ideal recycling solution to meet your needs.
