

Full Synthetic Energized With Nano Technology

ONE Lubricant

Zero Friction Technology

Introducing 100%

INDIGENOUS DEVELOPED BY
**STARTUP RECOGNIZED
COMPANY**

One Lubricant energized with proprietary Nano particles Technology Ensure all engine components in good condition from valve train to bearings are fully lubricated, minimising friction for optimum engine performance and protection for todays modern engine requiring lower viscosity lubrication for higher performance, The combination of high grade polymers and specially developed additives gives One lubricant excellent engine protecting qualities in most vulnerable conditions against wear and corrosion removing dust and other particles through oil filter keeping engine clean and extending drain period. Advanced ZFT technology enhances smooth engine performance, provides fuel saving without changing your driving conditions, its high grade guarantees immediate lubrication to all moving parts in the engine at the time of ignition.

ONE Lubricant

Zero Friction Technology

Benefits

- Maximizes short and long term engine performance.
- Delivers unsurpassed levels of protection across a variety of driving conditions and temperatures.
- Protects the engine for the entire drain interval even under extreme pressure.
- Enhances engine condition and performance by reducing power loss due to friction.
- Increase fuel savings.
- Decreases the Wear particle count.
- Extended Drain period.
- Increase in Pick-up & Smooth functioning.
- Reduces sludge formation.
- Reduces Engine sound.
- Reduces Down time and maintenance cost.
- Reduces Exhaust Pollution load on environment .
