DAKOTA MICRO LENS SELECTION GUIDE

This is what a vehicle will look like on your monitor from 50ft. away

There are a lot of ways to use your Dakota Micro camera system and we've made every task easier by making sure you always get the view you need. The AgCam and EnduraCam lines offer a choice of four different focal lengths, all made with durable, triple-hardened glass lenses. The lower the focal length, the wider the field of view. Take a look and choose what works best for you.

92° (3.6mm) Field of View Camera

46° (6mm) Field of View Camera

170° Field of View Camera

21° (12mm) Field of View Camera

15° (16mm) Field of View Camera

120° (2.8mm) Field of View Camera
